

SUMMARY

With the onset of the rainy season in Nigeria's conflict-affected northeastern State of Borno, varying degrees of damages are expected to infrastructures (self-made and constructed) in camps and camp-like settings. This is so because the rains are more often than not accompanied by very high winds and have been known to cause serious damage to properties.

On 15 June 2020, IOM's DTM program carried out an assessment to ascertain the level of damage sustained in camps and camp-like settings due to heavy windstorm and rainfall on the 14th of June 2020. Overall, 17 camps were affected in Maiduguri, Jere and konduga LGAs. The worst-hit of the camps assessed was the 250 Housing Estate (Dalori II Camp) in Konduga LGA where a heavy rainfall damaged 33 shelters, 6 toilets and 1 shower point leaving an estimated 135 individuals without shelter and 4 injured individuals.
