

## SITUATION UPDATE

Since DTM's last update on displacement from Tarhuna and Sirt on 10 June, an additional 760 displaced families (approximately 3,800 individuals) were identified, bringing the total of internally displaced persons to at least 5,550 families (approximately 27,750 individuals) who have been forced to leave their homes since 04 June. According to field observers, the security situation in Sirt and near-by locations remains tense.

## DISPLACEMENT LOCATIONS

Over the past days, new IDPs were identified in several locations in Eastern Libya, although displacement was observed at a slower pace than in the previous week. New arrivals of IDPs included major urban areas such as Benghazi, Bayda, Shahat and Tobruk. Please refer to the map on page two for more details on the current displacement locations.

## HUMANITARIAN SITUATION

Most tracked IDP families were identified to be currently staying in private accommodation, such as relatives, friends, host families and also rented apartments. Collective shelters have also been set up in most displacement locations by local authorities, in some cases also serving as transit sites for newly arrived IDP families who are looking for private accommodation to stay in.

The most commonly identified humanitarian priority needs so far have been food and NFIs, and to a lesser extent WASH and Health Assistance. Please refer to [DTM's previous update for more details on humanitarian needs identified in displacement locations](#). Reportedly, humanitarian assistance provision has started in several locations to address identified priority needs.

In terms of movement restrictions currently in place to curb the spread of COVID-19, surveyed IDP families in Eastern Libya overwhelmingly indicated that their access to markets and stores was not impeded (93% of 167 surveyed families). However, the economic slowdown and related difficulties faced by residents and IDPs in displacement locations in accessing livelihood opportunities remains an issue. Likewise, the [recent increase in confirmed COVID-19 cases in Libya](#) over the past weeks is of particular concern for vulnerable populations on the move who would be unproportionally impacted by movement restrictions from, to and within Libyan municipalities.
