

### Key DTM figures in the sites

**72 sites<sup>1</sup>**

**19,660 households**

17,179 by Cyclone Idai  
2,481 by floods

**95,338 individuals**

86,805 by Cyclone Idai  
8,533 by floods

**39 migrants have returned and settled since May**

**No actions taken on COVID-19 prevention and control in 3% of the sites<sup>2</sup>**

**Reportedly, people living in all the sites have been informed of the COVID-19 precaution measures**

**Source of information on COVID-19 in the 97% of sites with preventive controls**

The current outbreak of COVID-19 has resulted in a global pandemic, heightening the risk to vulnerable populations, internally displaced people and people on the move. On 22 March 2020, the Government of Mozambique officially declared the first positive COVID-19 case. Concern about the potential spread of COVID-19 in Mozambique was elevated in late March, when [according](#) to Mozambique's National Migration Service (SENAMI) over 14,000 Mozambican migrants returned from South Africa over the Ressano Garcia border within a span of a few days, as South Africa declared lock-down due to COVID-19, further heightening the risk to vulnerable populations especially the internally displaced population.

In response to this pandemic, IOM's Displacement Tracking Matrix (DTM) in collaboration with the Government of Mozambique's National Disaster Management Agency (INGC) conducted an assessment in the resettlement sites from 22 to 26 June 2020, with the sole purpose to inform the government and humanitarian partners on the precautionary measures currently available in resettlement sites hosting displaced populations since Cyclone Idai. The information gathered will help decision-makers to plan interventions and to recommend health and site preparations measures for outbreak prevention and containment in the resettlement sites in the central region.

In the 72 resettlement sites assessed, nine sites (Bandua 2019, Begaja, Chingemidji, Inhajou 2019 and Maximedje sites in Buzi district of Sofala province and Chibue, Macocoe, Mucombe and Ngurue sites in Sussudenga district of Manica province) reported that in the past month, 39 migrant workers from South Africa and Zimbabwe settled in the sites. All sites reported a noticeable change in people's behaviours and habits to better prevent COVID-19.

### Resettlement Sites in the Central Region of Mozambique

<sup>1</sup> Grudja (4 de Outubro/Nhabziconja) site in Buzi was split into two by INGC increasing the number of resettlement sites in the central region to 72.

<sup>2</sup> Remain the same when compared with previous assessment.

## Preparedness

When asked if actions for COVID-19 prevention and control are taken in the assessed resettlement sites, 97 per cent of sites (percentage unchanged since previous assessment) report taking actions while the remaining three per cent report not taking any actions. The sites (Magueba and Manhama 2) that report not taking any actions are located in Sussudenga district of Manica province.

When asked if basic COVID-19 Personal Protective Equipment (masks, gloves, etc.) available on site, 65 per cent (up from 47% in the previous assessment) of the assessed sites reported having personal protective supplies.

The depiction and use of boundaries, geographic names, and related data shown on maps and included in this report are not warranted to be error free nor do they imply judgment on the legal status of any territory, or any endorsement or acceptance of such boundaries by IOM.

## Annex 1: Preparedness Matrix for Resettlement Sites in Manica Province

Province	District	Site name	Were there any actions for COVID-19 prevention and control taken in the site?	Were people living in the site informed of the COVID-19 precaution measures?	Were there any awareness sessions held in the site to inform people of the COVID-19 precaution measures?	In the past month, any new hand washing station with soap and water was built?	Any of the COVID-19 protective equipment available in the site (masks, gloves, etc.)?	Is there isolation space available in the site?	Have you noticed any change in people's behaviours and habits to better prevent covid-19 in this site?
Manica	Sussundenga	25 de Setembro	Yes	Yes	Yes	Yes	Yes	No	Yes
