

Lainya, Terekeka & Juba County

On 20 and 21 August 2020, clashes between NAS and SSPSF forces in Juba and Lainya Counties led to the displacement of people living in the surrounding areas. Clashes that included the targeting of vice presidential bodyguards around 20 August 2020 in strategic areas around Lobonok, forced 19,100 individuals (3,820 households) to move from Yapa and seek refuge among host communities in Lobonok with a further 6,208 individuals (1,001 households) fleeing from Opiri to Liria in Juba County. Additional instances of displacement occurred in Lainya County where 1,574 individuals (261 households) were forced to move to Lainya Centre due to clashes between NAS and SSPDF forces in Giwaya, Lainya County.

Up to 86,720 individuals (17,344 households) were displaced from lowlands in Gemmeiza, Nyori, and Terekeka Town to highlands of the latter due to serious flooding resulting from heavy rainfall. Floods also forced 2,520 individuals (420 households) to move from lowland areas to highland areas of Jabal Lado in Juba County. The displaced found refuge among host communities. The most urgent needs identified include food, water, shelter, sanitation and protection .¹

¹ Please note that not all coordinates for reported locations were available at the time of writing. The map only displays locations for which coordinates were available.

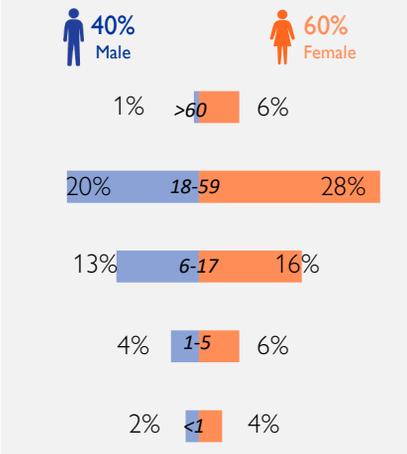

Assessment Date	Location	Trigger for movement	IDPs (Households)	IDPs (individuals)	Setting
20 August 2020	Lainya Centre	Armed Clashes	261	1,574	Site
21 August 2020	Gemmeiza, Nyori & Terekeka Town	Natural Disaster	17,344	86,720	Host Community
21 August 2020	Lobonok	Armed Clashes	3,820	19,100	Host Community
21 August 2020	Liria	Armed Clashes	1,001	6,208	Host Community
23 August 2020	Jabal Lado	Natural Disaster	420	2,520	Host Community

IOM DTM employs Event Tracking as a more rapid and localized assessment tool complementing overall efforts to report on IDP and returnee figures nationally (see Mobility Tracking reports and maps on displacement.iom.int/south-sudan). IOM teams access IDP / returnee locations and consult local key informants including community representatives, local authorities or humanitarian partners and triangulate findings to provide partners with the most accurate as possible, actionable and current data.
