

Reported COVID-19 Cases in Sudan

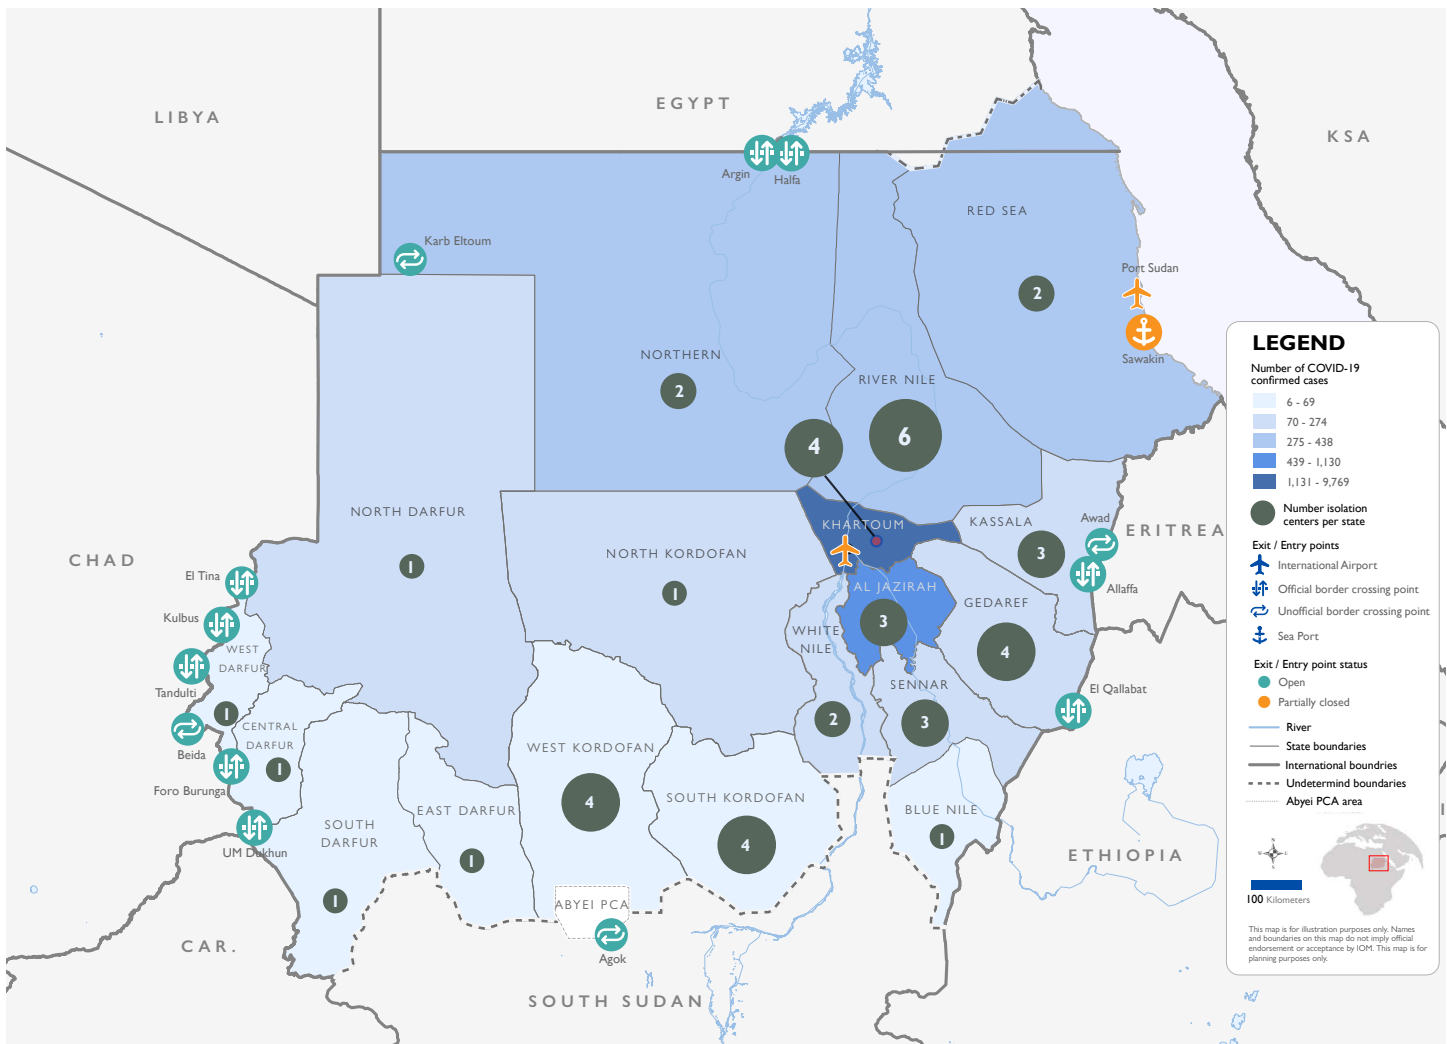

Source: *Government of Sudan, Federal Ministry of Health*

Figures on cases updated as of 22 September 2020

13,578 Confirmed
6,764 Recovered
836 Deaths

Mobility Restrictions

COVID-19 has now spread to all of Sudan's 18 states. The majority of all confirmed cases are in Khartoum State. In response to the pandemic, the Government of Sudan (GoS) declared a nationwide health emergency and introduced mitigation measures in March 2020 to reduce the transmission of the virus. These measures included restrictions on travel due to closure of airports, points of entry (PoE) along land borders and maritime boundaries, as well as domestic movement restrictions.

Data on Points of Entry (POEs) are based on reports from DTM Sudan Key Informant (KI) networks and do not include all POEs in the country

Khartoum International Airport (KRT) is partially open for domestic and international flights, barring flights to and from Saudi Arabia which are expected to resume on 1 October 2020. COVID-19 testing prior to all departures and arrivals is mandatory, and a negative COVID-19 test certificate (valid for 96 hours) is required before travel. Port Sudan New International Airport (PZU) is partially open for entry and exit, in accordance to KRT regulations.

All land border crossing points between Sudan and neighbouring countries are now open for entry and exit, and transportation services have resumed. All internal state borders are open and domestic bus travel between states has resumed.

Domestic movement restrictions have been lifted in Khartoum State.
