

Mayom County, Unity State

On 10 September 2020, IOM's Displacement Tracking Matrix joined an inter-agency flood assessment team in Mankien Town and Ruathnyibol to assess displacement dynamics, settlements and needs of flood affected populations. The floods displaced 3,015 individuals (425 households) in both locations. Direct observations and interviews with key informants indicate that the displaced population found refuge with host communities who were less affected by the floods. A section of the population did not move from the flooded areas due to two main reasons. Some larger households were said not to find space among the host community and others stayed behind to create dykes protecting property.

The host community and IDPs are appealing to humanitarian partners for assistance. Urgent needs identified include water, sanitation, health, non-food items including mosquito nets.

Assessment Date	Location	Main trigger for movement	IDPs Households	IDPs Inds.	Setting
10 September 2020	Ruathnyibol	Natural Disaster (Flooding)	285	2,000	Host Community
10 September 2020	Mankien Town	Natural Disaster (Flooding)	140	1,015	Host Community

IOM DTM employs Event Tracking as a more rapid and localized assessment tool complementing overall efforts to report on IDP and returnee figures nationally (see Mobility Tracking reports and maps on displacement.iom.int/south-sudan). IOM teams access IDP / returnee locations and consult local key informants including community representatives, local authorities or humanitarian partners and triangulate findings to provide partners with the most accurate as possible, actionable and current data.
