

The objective of the Emergency Tracking Tool (ETT) is to collect information on large and sudden population movements. Information is collected through key informant interviews or direct observation. This dashboard provides information on movements which took place in two sites of Lac Province, on 24 November 2020.

On **24 November 2020**, following **floods** caused by **rising water levels** of Lake Chad, **780 households (3,901 individuals)** fled their villages for the sites of **Djourougafi** and **Ngolio** located in the sous-préfecture of **Liwa** (**Fouli** département). These two displacement sites, created in August 2020, already hosted respectively 3,190 and 450 IDPs prior to their arrival.

According to the authorities, more than **15,000 households** are **threatened by floods** in at least **60 sites and villages**, within the sous-préfectures of **Baga-Sola, Ngouboua and Liwa**.

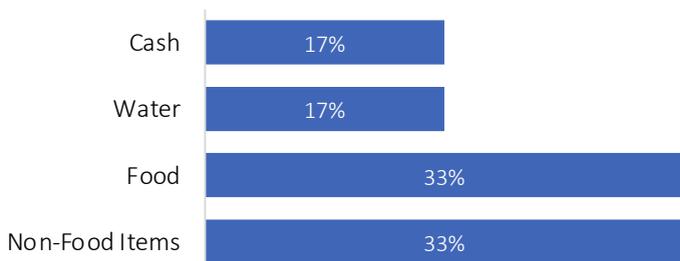

**METHODOLOGY** : Data was collected through direct observation and phone interviews with key informants

**SUMMARY OF EVENTS**

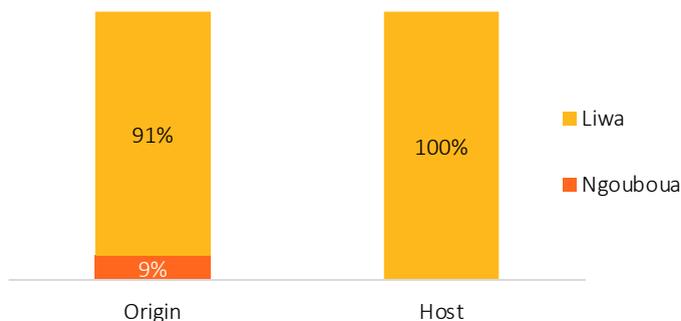

**Number of movements and IDPs**

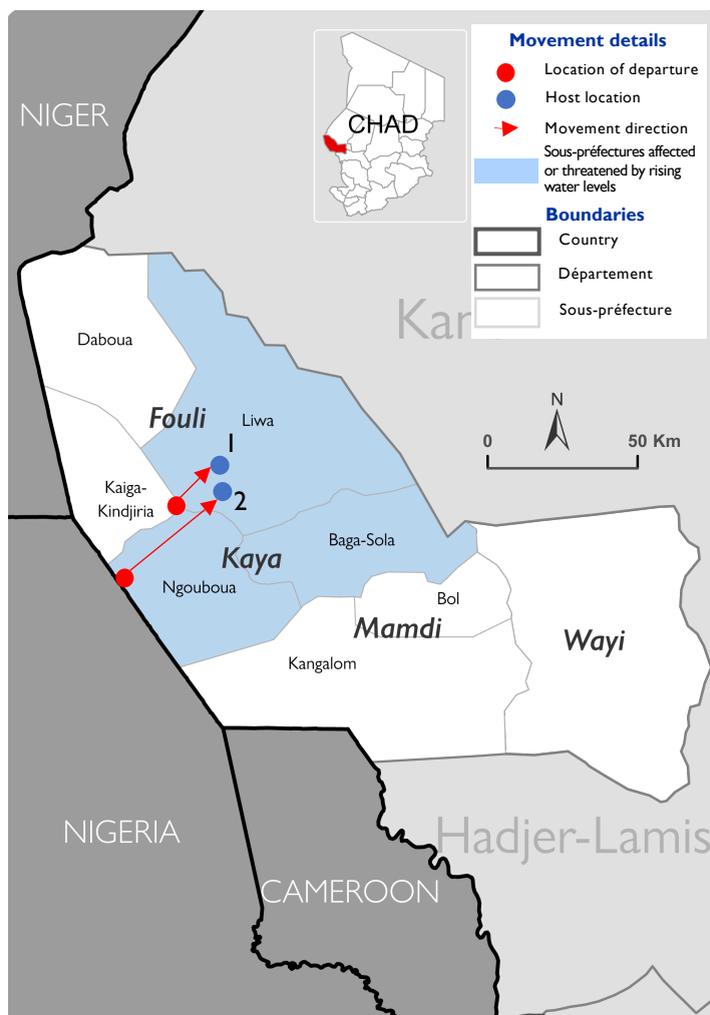

**Priority needs**

**Origin and host sous-préfectures of IDPs**

**Movement details**
