16
Official Land Border Crossings

24
Unofficial Land Border Crossing

IOM's Displacement Tracking Matrix (DTM) collects information biweekly about current COVID-19 movement restrictions at points of entry in Afghanistan in coordination with government counterparts and key informants. This information sheet shows the geographical location and operational status of each PoE monitored, since March 2020.

Point of Entry (PoE) Locations

Operational Status

- Closed for entry and exit (27)
- Open for entry & exit (10)
- Open for commercial traffic only (6)
- Closed for exit (1)
- Other (0)

Point of Entry (POE) Legend

<h3>Affected Populations</h3> <ul style="list-style-type: none"> N Nationals RT Regular travellers IR Irregular migrants R Returnees IDP IDPs MW Migrant workers 	<h3>Movement Restrictions</h3> <ul style="list-style-type: none"> R1 Entrance restrictions R2 Exit restrictions R3 Changes in visa or permit requirements R4 Restrictions for specific nationalities R5 Negative COVID-19 medical certificate required 	<h3>Operational Status</h3> <ul style="list-style-type: none"> 1 Open for entry and exit 2 Closed for exit 3 Closed for entry and exit 4 Open for commercial traffic only 5 Partial Closure 6 Other

Monitoring COVID-19 Impact and Response at Points of Entry

The COVID-19 pandemic has resulted in unprecedented containment policies to restrict global human mobility in order to prevent the spread of the virus. To better understand how COVID-19 affects global, national, and sub-national mobility, IOM has developed a global mobility database to map, track and analyse the impact of the COVID-19 pandemic on Points of Entry (PoE).

This information is meant to serve IOM, Donors, UN partners and Government counterparts to better understand the present, situation at PoE and tailor their COVID response. DTM has been regularly monitoring PoEs throughout the pandemic, since March 2020, utilizing a range of knowledgeable key informants, including International Health Regulations (IHR) officials from the Ministry of Public Health, border officials, cross-border communities, and IOM teams working at key border crossing points. DTM collects data on the following PoE: Airports [presently or recently functioning airports with designated International Air Traffic Association (IATA) code]; Land border crossing points [international border crossing points on land, including rail]; and Blue border crossing points [international border crossing on water bodies, e.g. sea, rivers, and lakes].

DTM focal points operating near the PoEs reach out to key informants biweekly to collect comprehensive data, including the following attributes: movement restrictions; operational status; population flows; affected populations; risk communication and community engagement (RCCE); infection, prevention and control (IPC); presence of border health staff; disease surveillance and health referral systems; and border staff health & safety.

DTM collects data and reports on population flows and the status of border crossings through its PoE and Flow Monitoring activities, like here at Spin boldak - Chaman. © IOM 2020
