Mobility Restrictions

In response to the COVID-19 pandemic, the local authorities of Yemen declared a nationwide health emergency and introduced many preventative measures similar to those adopted by the rest of the world starting in March 2020, in order to reduce the transmission of the virus. The Yemeni authorities had put additional preventive measures and health screenings for people passing through ten transit points used for public movement between southern and northern governorates, specifically at points located in Taizz and Al-Bayda. Recently, these restrictions have been loosened and the health screenings have been removed. For Yemeni returnees from KSA through the Al'Wadeeah border entry point, providing a COVID-19 PCR test report is mandatory by the Yemeni authorities. Authorities at Al'Wadeeah entry point have installed a PCR testing facility at the entry point for travelers who arrive without a PCR test report. On 28 September 2020, Sana'a International Airport reopened for humanitarian flights. Fifteen sea border points and three land border points are reopened for movement.

- The movement restrictions have eased recently, and the health screenings have been removed from transit points.
- Transit points are open for the entry and exit of passengers. Authorities at Al'Wadeeah land border allow Yemenis to enter Yemen conditional they provide a COVID-19 PCR test report.
- Sana'a International Airport has reopened for humanitarian flights.
