

Assessment method

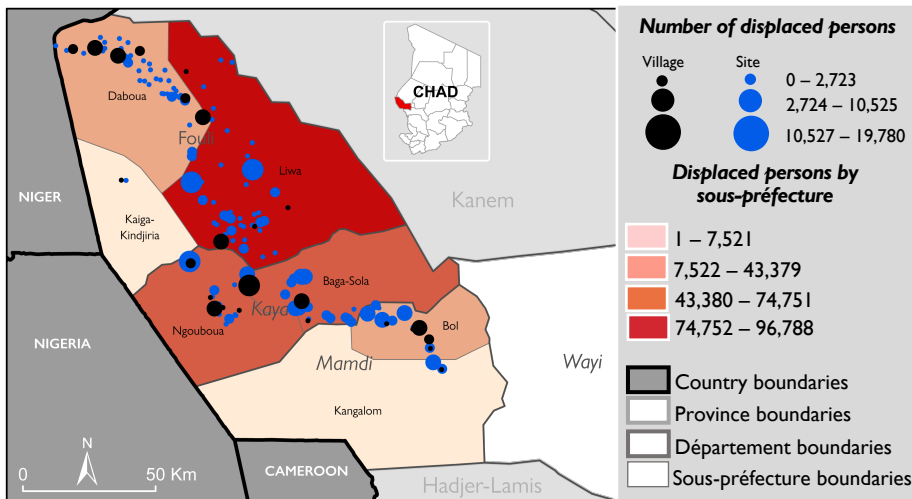

Displacement overview

Demographic profile

Demographic data were collected at the household level through a demographic calculator with a sample of 1,308 households

The maps included in this report are for illustrative purposes only. Representations and the use of boundaries and geographical names on these maps may include errors and do not imply judgment of the legal status of a territory, nor official recognition or acceptance of these boundaries by IOM. Geographic coordinates of villages and sites were collected during field assessments. For the locations which were assessed remotely, the geographic coordinates were taken from the previous round.

Changes in the number of displaced persons identified in the last five rounds

Context and methodology

Since 2015, Chad has been the target of repeated attacks by armed groups conducting an insurgency in the Lake Chad Basin (Cameroon, Chad, Niger, Nigeria), which have caused significant internal and cross-border population displacements. In Chad, IOM has been implementing the Displacement Tracking Matrix (DTM) since May 2015 in Lac Province to gather updates on the number, profiles, and needs of populations displaced due to the crisis, in order to inform humanitarian and development programmes. This dashboard presents key results from DTM assessments carried out with key informants between 11 September and 5 October 2020 in 217 displacement locations. During this round, 18 per cent of locations were assessed through phone interviews, mainly due to access challenges to the islands of Lake Chad, which were targeted by armed attacks during the data collection period.

During this round of data collection, the number of Internally Displaced Persons (IDPs) increased by 13 per cent as compared to round 12. This increase can be explained by worsening security conditions (mainly in Kaiga-Kindjiria, Kagalom and Liwa sous-préfectures), which led many individuals to flee their homes preventively or following armed attacks. In addition, 1 per cent of IDPs (4,419 individuals) were displaced by floods caused by heavy rainfall in Lac Province. As in the last round, key indicators related to COVID-19 awareness and preparedness were included in data collection (see page 2).

Displaced populations

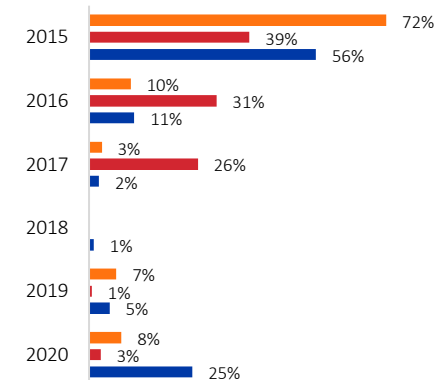

336,124 Internally Displaced Persons (IDPs)

30,422 Returnees from abroad

26,937 Returnees – Former IDPs

Year of displacement

Location of displaced persons

5 confirmed COVID-19 cases in Lac Province as of 5 October 2020 (including 4 recoveries and 1 death). No cases have been identified among displaced populations.

Distance to the closest health services

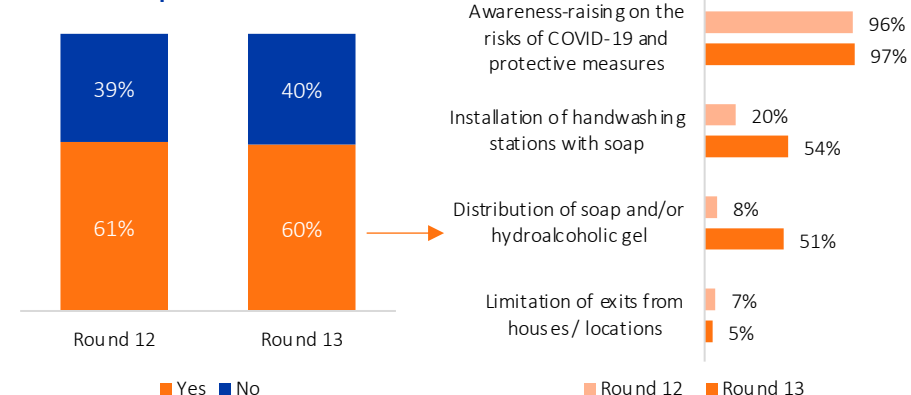

Awareness of COVID-19 and preventive measures taken in assessed locations

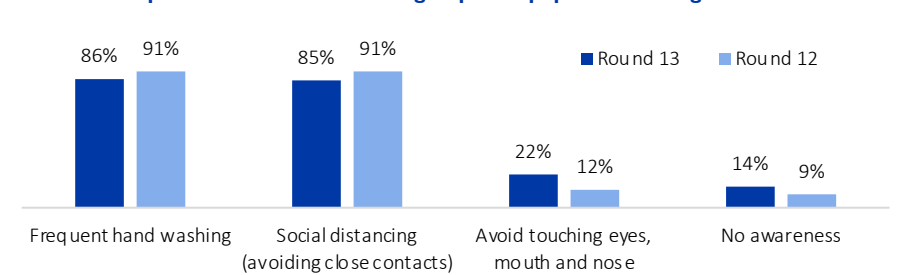

General awareness of COVID-19 in assessed locations

Level of COVID-19 awareness	% of locations	
	Round 13	Round 12
Everyone is aware (> 75%)	69%	71%
Most individuals are aware (50 - 75%)	13%	22%
Less than half of individuals are aware (25 - 50%)	8%	5%
None or very few are aware (< 25%)	4%	0%
Does not know / No answer	6%	2%

« Have measures been taken in the assessed location to prevent or limit the spread of COVID-19 ? »

Awareness of protective measures among displaced populations living in assessed locations
