

FLASH REPORT 16 - TROPICAL CYCLONE ELOISE

IOM/INGD Rapid assessment

Damages to resettlement sites - Sofala, Manica and Zambezia Provinces

IOM MOZAMBIQUE | SOFALA, MANICA, AND ZAMBEZIA PROVINCES

27 JANUARY 2021

8,755 Families

6 Health

11 Schools

1,032 Tents

7,225 Shelters

The landfall of Tropical Cyclone Eloise in the night of 23 January 2021 and Tropical Storm Chalane on 30 December 2020 has affected Sofala, Manica, the southern part of Zambezia, Inhambane, and Gaza provinces. Sofala was the most affected province, with Buzi, Dondo Nhamatanda, and Chibabava districts reporting significant damages to shelters, while Caia, also in Sofala province reported some damages in four of the resettlement sites assessed in the district. The Province of Manica, more specifically Sussundenga district, also reported some damages after the tropical cyclone, the southern part of Zambezia also reported damages to shelters in resettlement sites.

RAPID ASSESSMENT

Following these events, a rapid assessment was conducted by the International Organization for Migration (IOM) in collaboration with the National Institute for Disaster Management and Risk Reduction (INGD), between the 24 to 26 January 2021. The assessment focuses on understanding the extent of damages to shelters and facilities across all 70 existing resettlement sites in Sofala, Manica, and Zambezia Provinces, which were established in the aftermath of Tropical Cyclone Idai in 2019. These resettlement sites are particularly exposed and vulnerable to damages as a result of environmental factors, since durable solutions and build back better initiatives are not yet comprehensively supported and implemented at this point in time. Therefore, damages were reported in resettlement sites where people displaced by Cyclone Idai live, with thousands of tents and temporary shelters destroyed, as well as permanent structures such as schools and hospitals.

As a result of the impact of Tropical Cyclone Eloise, 8,755 families had their tents and shelters destroyed/partially destroyed. Of these, 6,790 are located in Sofala, 1,695 in Manica, and 270 in Zambezia provinces. The affected districts are Buzi (4,619 households), Dondo (1,230 households), Chibabava (773 households), Caia (66 households), and Nhamatanda (102) all in Sofala province; Sussundenga (1,695 households) in Manica province; and Maganja da Costa (143 households), Namacurra (62 households), and Nicoadala (65 households) all in Zambezia province. In total, five resettlement sites out of the 70 resettlement sites assessed are still inaccessible by road due to flooding as of 26 January 2021, these are: Inhajou 2019 (446 households), and Nhamacunta (430 households) in Buzi district, and Savane (283 households), all in Sofala province; Tossene Choma (339 households) and Ngurue (138 households) in Sussundenga of Manica (households figures for the inaccessible sites were extracted from the Multi-sectoral Location Assessment [MSLA] Round 18, conducted immediately after Tropical Storm Chalane).

In total, 563 upgraded shelters, 6,662 emergency shelters, 1,032 tents and 498 permanent houses were completely or partially destroyed due to the rain and strong winds. Additionally, IOM/INGD identified 5,292 latrines and eight water points damaged.

Moreover, 11 schools near or on the sites were damaged. All are located in Sofala, six in Dondo district, three in Nhamatanda district and two in Dondo.

Six health centers near sites were also damaged, in the resettlement site of Maxiquiri Alto/Maxiquiri 1 (Buzi), Macarate (Chibabava), Mutua (Dondo) and Ndedja 1, Metuchira and 7 Abril-Cura (Nhamatanda).

In the resettlement sites of Mutua (Dondo) and 7 Abril-Cura (Nhamatanda), two children were reported to have been separated from their parents in the process of leaving at-risk areas. Two elderly persons were left behind without care in the forementioned sites.

Accessibility status of resettlement sites in Sofala, Manica and Zambezia provinces

There is no cellphone network in 6% of localities assessed

There is no electricity in 89% of localities assessed

Top types of NFI needed but not accessible to individuals in resettlement sites

MAP OF ASSESSED SITES

This map is for illustration purposes only. The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the International Organization for Migration.

RESETTLEMENT SITES AFFECTED IN SOFALA, MANICA, AND ZAMBEZIA

BY TROPICAL CYCLONE ELOISE

The table below summarizes the extent of damages to shelters and facilities across all 65 assessible resettlement sites in Sofala, Manica, and Provinces. Please note that for the temporary structures (upgraded shelters, emergency shelters and tents), the total figure provided is a sum of affected structures (both partially and totally destroyed). For more information, and to have access to the complete data set, please contact the IOM/DTM team (DTMMozambique@iom.int).
