Naivasha IDP Camp : 8,597 individuals

50% Male **50%** Female

Masna Collective Centre: 3,860 individuals

49% Male **51%** Female

Methodology

Since biometric registrations or verifications are not feasible on a monthly basis, population counts remain the best possible tool to estimate the sites' populations. Population counts consist of DTM teams visiting each shelter of the site asking how many persons have slept there the previous night (sex and age disaggregated). This provides a snapshot of the population at the time of the count.
