

EMERGENCY EVENT TRACKING

Data collection: 21 February 2021

CONFLICT

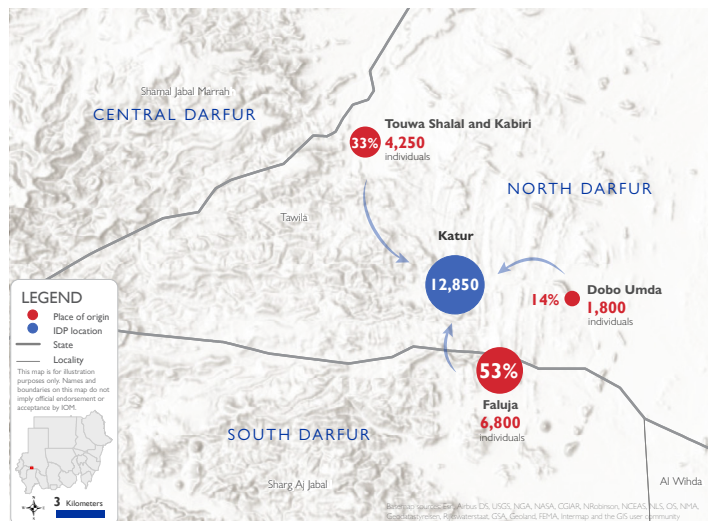

The DTM Emergency Event Tracking (EET) is deployed to track sudden displacement and population movements, provide more frequent updates on the scale of displacement and quantify the affected population when needed. As a subcomponent of the new Mobility Tracking methodology in Sudan (Round One), and activated on a need basis, EET utilises a broad network of key informants to capture best estimates of the affected population presence per location – a useful tool for humanitarian response planning and design.

## Event Overview

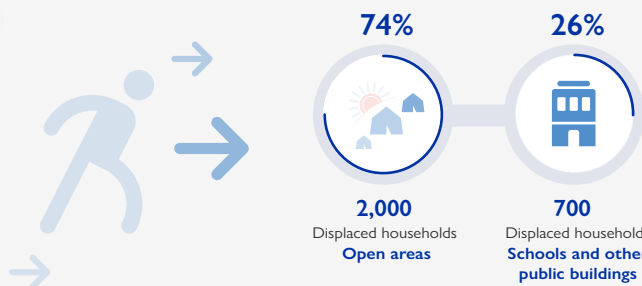

DTM teams activated EET to monitor the displacement of individuals affected by inter-communal conflict between Fur and Arab tribes in Sharg Aj Jabal (East Jabal Marrah) and Tawila localities since 24 January 2021. For more information, please see [EET Tawila, North Darfur 001](#).

The second update estimates a total number of 12,850 individuals (2,700 households) seeking shelter in Katur village, having been displaced from Faluja (53%), Touwa Shalal and Kabiri (33%), and Dobo Umda (14%). Since the first EET, there has been a 41 per cent increase in the captured number of individuals displaced, in addition to 23 households returning to Dobo Umda. All individuals are Sudanese nationals. At least 872 individuals out of the captured caseload have additional vulnerabilities in need of assistance and support, meanwhile 27 unaccompanied minors were reunited with their families since the previous update. With no new losses indicated, reports indicate that six individuals have been killed and eight sustained injuries, whilst at least 800 internally displaced persons (IDPs) have lost personal belongings and livestock. Based on a ranking scale, the three main priority needs identified are food, non-food items and emergency shelter. Urgent humanitarian assistance is needed for the new arrivals. Field teams further report roads between Sharg Aj Jabal and El Fasher are no longer blocked and armed forces have been deployed to contain the situation.

## Shelter Indicator

Approximately 700 IDP households (26%) are sheltering in schools or other public buildings located in Katur village, whilst 2,000 households (74%) are gathering in open areas of Katur village, and are in critical need of emergency shelter.
