Affected Individuals:  
3,380

Departure from:  
Njine Ward - Marte LGA

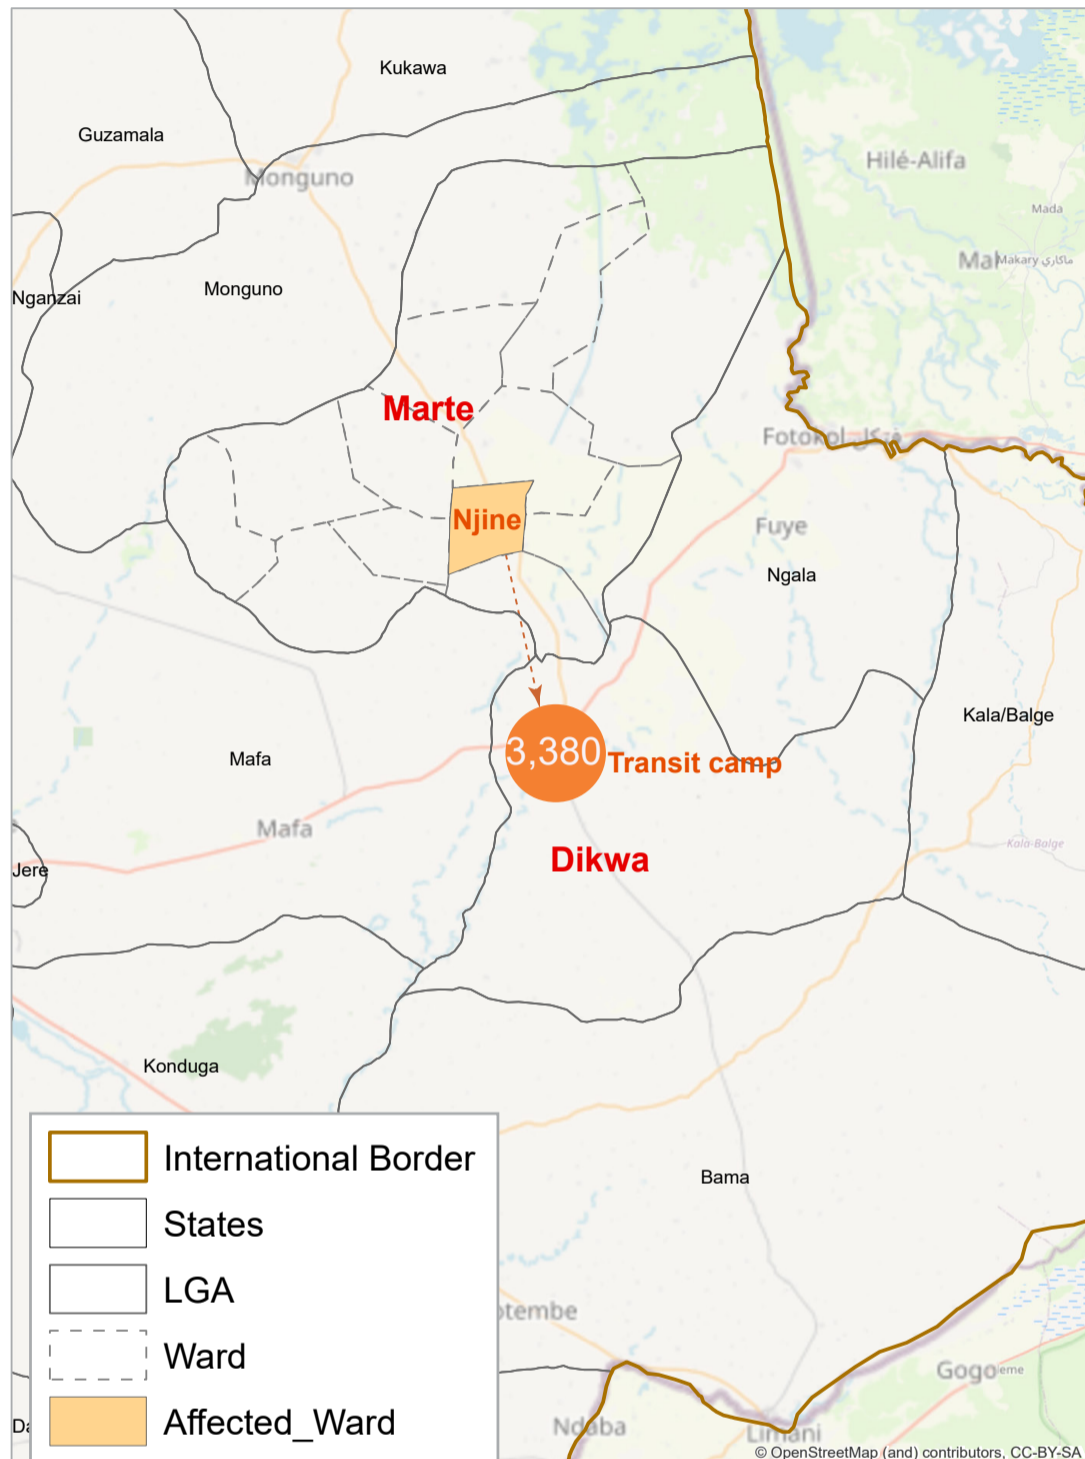

Movement Trigger:  
Armed attacks

### OVERVIEW

The lingering conflict in Nigeria's North East Zone has been the major cause of widespread population displacement. Over 700,000 persons have been forced to leave their areas of residence in search of safety and security in neighbouring Wards and LGAs.

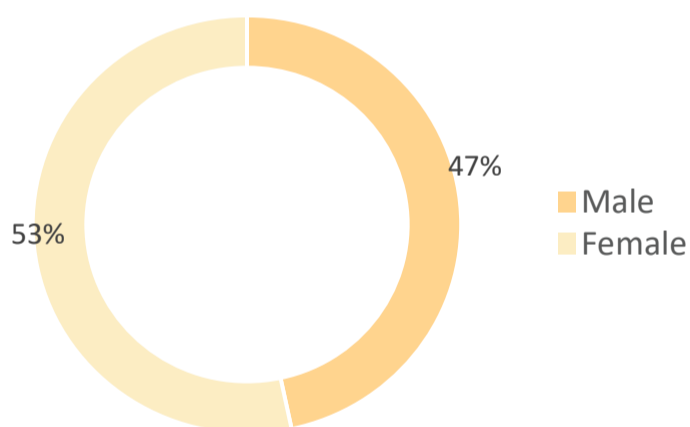

On 14 February 2021, a Non-State Armed Group (NSAG) carried out an attack in Njine Ward of Marte LGA, leading to a substantial wave of population displacement. Following the attack, a rapid assessment was conducted by DTM (Displacement Tracking Matrix) field staff with the purpose of informing the humanitarian community and government partners, and enabling targeted response. Flash reports utilise direct observation and a broad network of key informants to gather representative data and collect information on the number, profile and immediate needs of the affected populations.

The attack in Marte LGA affected approximately 3,380 individuals from Njine Ward and has caused a considerable movement towards the transit camp located in neighbouring Dikwa LGA. Other displaced persons fled to other LGAs, including the state's capital Maiduguri.
