

### OVERVIEW

In January 2021, a total of **17,316** movements were observed across Ethiopia's five flow monitoring points (FMPs). This represents a **16% increase** in daily average movement in comparison with December 2020 when an average of 483 movements per day were observed. It should be noted that data collection at Humera Flow Monitoring Point in Tigray region could not happen due to security and access constraints, thus affecting the total number of movements for this month.

Following the steady increase in movements, outgoing movements during January have continued to be significantly higher (77%) than incoming movements (23%). The percentage of outgoing versus incoming movements have climbed above the proportions observed before the first COVID-19 case was confirmed in Ethiopia. A total of **13,416** outgoing movements were observed of which 6,610 (49%) were going to the Kingdom of Saudi Arabia, 2,311 (17%) intended to go to Djibouti, 1,899 (14%) were going to Kenya, 771 (6%) to Yemen and 762 (6%) headed to South Africa.

On the other hand, **3,900** incoming movements were observed, of which 2,643 (68%) had originated from Sudan while 545 (14%) and 516 (13%) came from Kenya and Djibouti respectively. Almost all of these were Ethiopian nationals who were likely returning home. The number of incoming movements into Ethiopia from Sudan has increased since the outbreak of the Northern Ethiopia Crisis by an average of 10% in the past two months compared to the number of incoming movements observed prior to the crisis.

### DEMOGRAPHICS

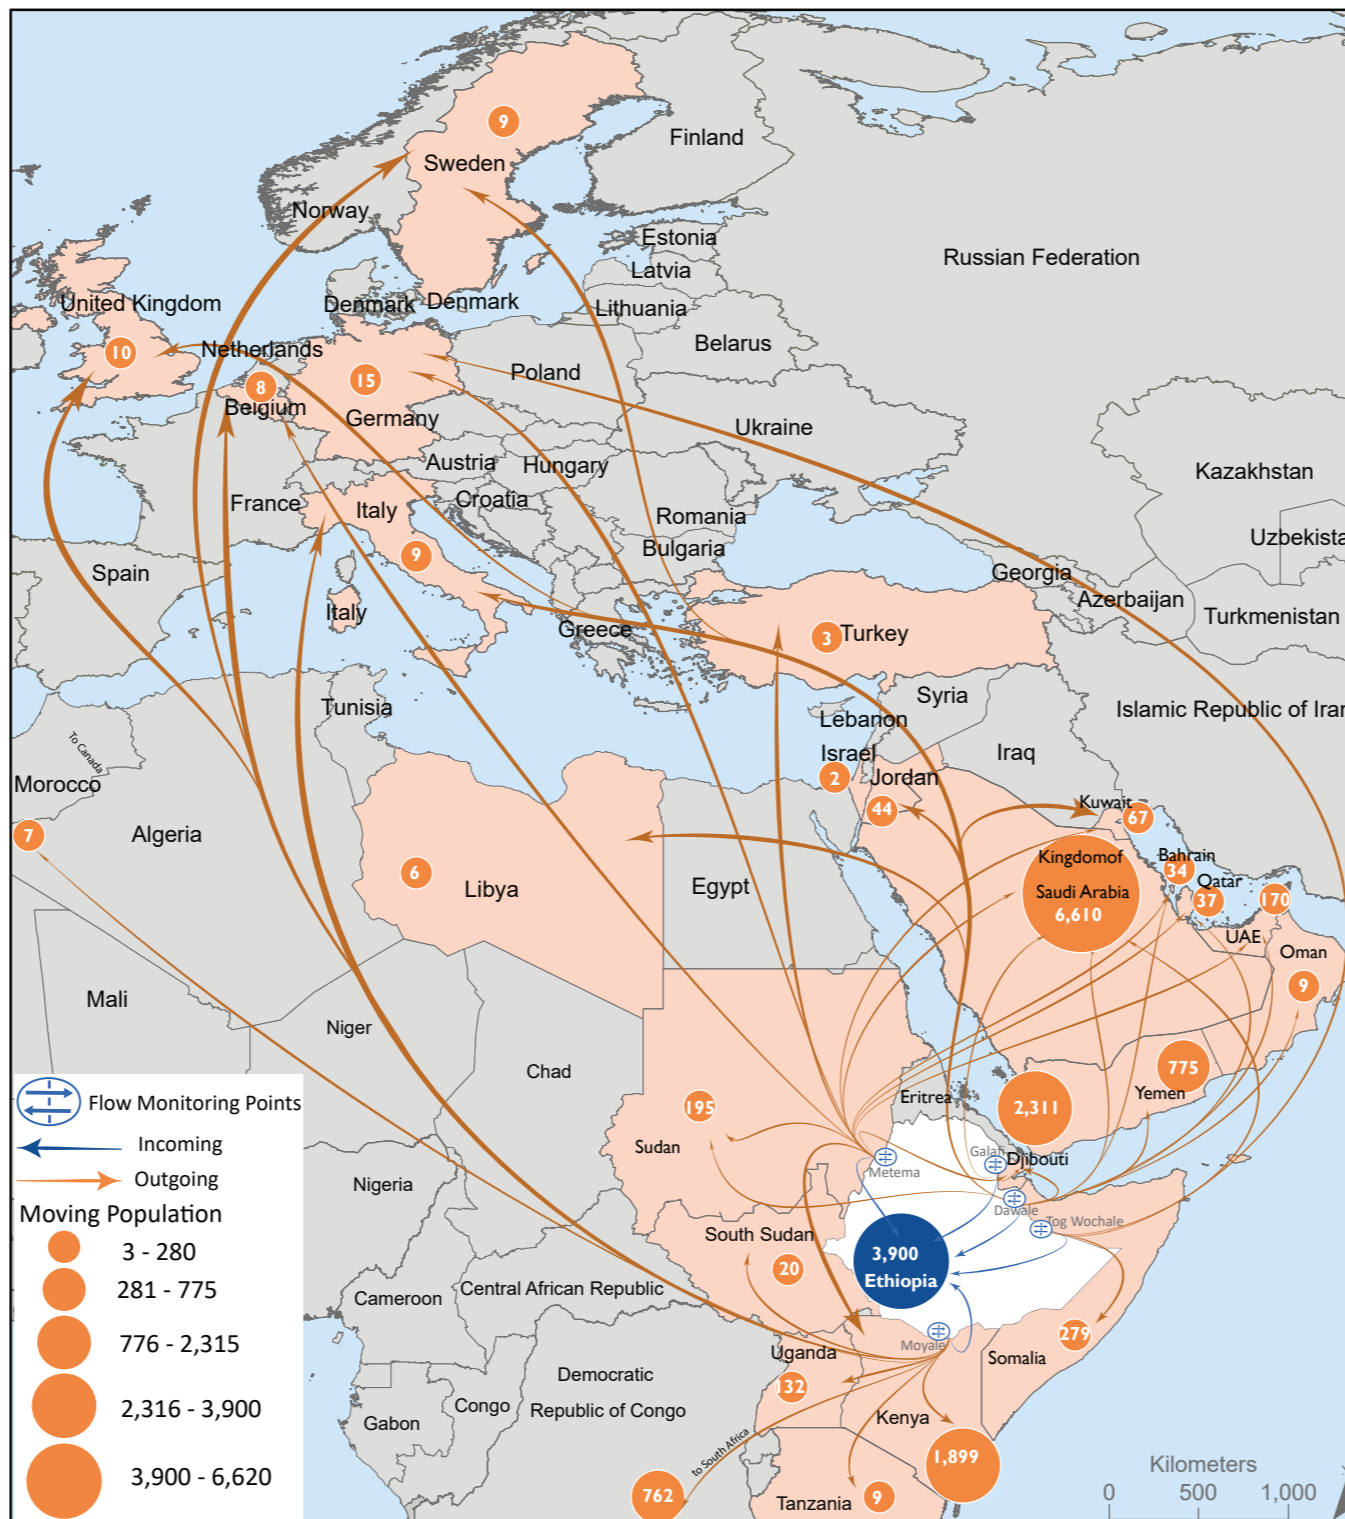

### VULNERABILITY PROFILE

|      |                               |
|------|-------------------------------|
| 2.0% | Children Under 5 years        |
| 2.0% | Male Unaccompanied Children   |
| 1.1% | Lactating Mothers             |
| 1.0% | Female Unaccompanied Children |
| 0.6% | Persons with disability       |
| 0.4% | Pregnant Females              |
| 0.1% | Older in need of care (60+)   |
