

OVERVIEW

On January 12th 2010, an earthquake of 7.0 magnitude hit Haiti, resulting in the destruction of more than 300,000 buildings and the displacement of 1.5 million people. Following this destructive earthquake, and as the lead Camp Coordination/Camp Management agency, IOM took the initiative to develop a unified displacement data management process, called the Displacement Tracking Matrix (DTM), a comprehensive, multi-sectoral tracking system, was applied as a monitoring tool to track the IDP population on basic conditions in IDP sites, and camp-like settlements in support of the Emergency Shelter and Camp Coordination and Camp Management (E-Shelter/CCCM) Cluster and other humanitarian and recovery actors in Haiti. IOM implements the DTM, in partnership with the Government of Haiti (GoH) through the Directorate of Civil Protection (DPC in French).

HIGHLIGHTS

	16,497 IDP Households or 61,302 IDP Individuals still living in IDP sites
	33 Displacement Sites still open
	88% Tent and makeshift shelter sites
	12% T-Shelter sites
	3 IDP sites closed between 1 st April 2016 and 30 th June 2016.
	3 sites closed thanks to rental subsidy programs.

TABLE 1: Number of sites, Households and Individuals per commune as of June 2016

Commune	Sites	Households	Individuals
CARREFOUR	2	753	2,777
CITE SOLEIL	1	446	2,292
CROIX-DES-BOUQUETS	5	2,477	10,799
DELMAS	9	9,930	32,637
GRESSIER	2	165	677
LEOGANE	7	1,025	4,200
PETION-VILLE	1	560	2,836
PORT-AU-PRINCE	1	500	2,157
TABARRE	5	641	2,927
Total	33	16,497	61,302

GRAPH 1: Decrease Trends from July 2010 to June 2016 – IDP Sites

GRAPH 2: Decrease Trends from July 2010 to June 2016 – IDP Households

GRAPH 3: Decrease Trends from July 2010 to June 2016 - IDP Individuals

1. IDP POPULATION: DISPLACED HOUSEHOLDS AND INDIVIDUALS

As of 30th June 2016, the three (3) communes with the highest IDP population are the following:

1. Delmas: 9,930 households corresponding 32,637 individuals
2. Croix-des-Bouquets: 2,477 households corresponding to 10,799 individuals
3. Léogane: 1,025 households corresponding to 4,200 individuals

GRAPH 4: Percentage of IDP households still living in IDP sites in June 2016.

GRAPH 5: Percentage of IDP individuals still living in IDP sites in June 2016.

16,497 IDP Households or **61,302** IDP Individuals still reside in camps and camp-like settlements in Haiti.

2. IDP SITES: CAMPS AND CAMP-LIKE SETTLEMENTS

As of 30th June 2016, the four (4) communes with the highest number of IDP sites are the following:

1. Delmas: 9 IDP sites
2. Léogane: 7 IDP sites
3. Croix-des-Bouquets and Tabarre: with 5 sites each.

GRAPH 6: Percentage of IDP sites still opens in June 2016.

TABLE 2: Classification of sites by the type of shelters as of 30th June 2016

Types of Shelters	Percentage	# of sites	# of Households	# of Individuals
T-Shelters sites (60% plus)	12%	4	3,539	14,055
Sites with Tents ONLY	88%	29	12958	47247
Tous Shelter Types	100%	33	16,497	61,302

29 sites are almost entirely made up of **tents**.

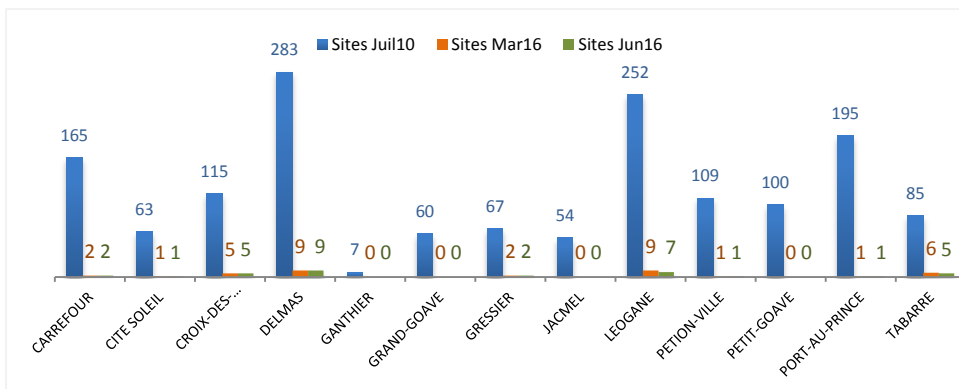

4 sites have a percentage of **60%** or more of **T-Shelters**.

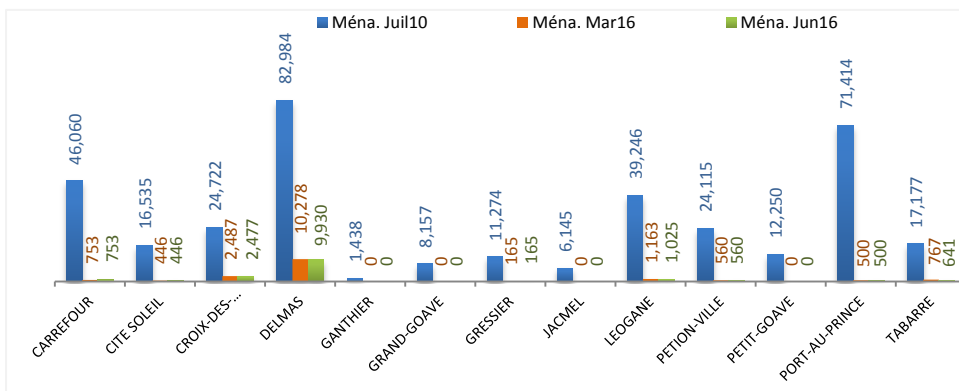

3. DECREASE IN THE IDP CASELOAD

When comparing the figures from the 26th round of the DTM to the IDP figures from 2010, a net decrease of 345,020 of the total households (or 1,475,145 individuals) identified in 2010, can be observed. Furthermore, this also represents a decrease of 1,522 sites compared to July 2010, during the height of the internal displacement in Haiti.

GRAPH 7: Comparison of IDP sites by commune in July 2010, March and June 2016.

GRAPH 8: Comparison of IDP households by commune in July 2010, March and June 2016.

Since July 2010, the IDP household population has **decreased by 95.4%**.

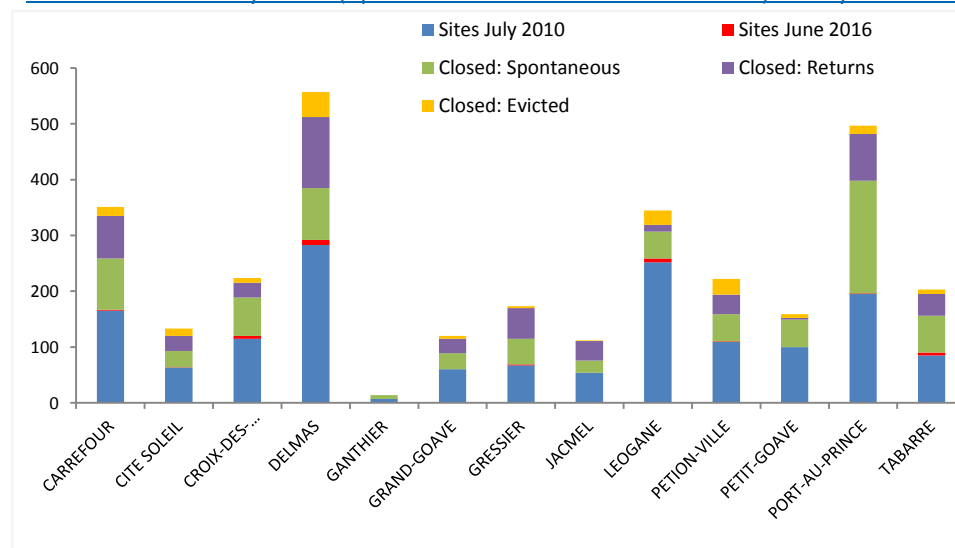

4. LEAVING SITES AND RETURNING HOME: EVICTIONS, SPONTANEOUS RETURNS, ASSISTED RETURNS AND RELOCATION¹

During this reporting period, 3 camps have been reported as closed, whereby a total of 268 households (representing 1,004 individuals) were relocated through the return program. Furthermore, there were no evictions during this round of DTM assessments.

TABLE 3: Households, Individuals and Sites Status (open or closed) from July 2010 to June 2016.

Status of Sites	# of sites	# of Households	# of Individuals
Open Sites	33	16,497	61,302
Evictions	176	14,444	60,570
Rental Grant	545	82,589	277,807
Spontaneous Returns	801	251,444	1,143,108
Total	1,555	364,974	1,542,787

GRAPH 9: IDP sites by status (open or closed with reason for closure) and by commune

Since 2010, **82,589 households** have left camps through rental subsidy programs, leading to the closure of **545 sites**.

¹ This section presents information on camps closed through rental subsidy programs during the period covered by this report. It does not contain information on ongoing relocation programs in open camps; upon their closure, they will be reported on.

5. DTM METHODOLOGY

The Displacement Tracking Matrix (DTM) is a monitoring tool designed to track Internally Displaced Persons (IDP) on basic conditions in IDP sites and camp-like settlements in support of the Emergency Shelter and Camp Coordination and Camp Management (E-Shelter/CCCM) Cluster and other humanitarian and recovery actors in Haiti. The International Organization for Migration (IOM) implements the DTM, in partnership with the Government of Haiti (GoH) through

the Directorate of Civil Protection (DPC in French).

Assessments are carried out on a tri-monthly basis across all identified IDP sites in the Port-au-Prince metropolitan area and the southern regions affected by the 12 January 2010 earthquake. The DTM has been utilized to monitor the population living in IDP sites since March 2010, and was revised (DTM v2.0) in October 2010 to meet the changing information needs as the displacement situation evolved.

A team of 20 staff members implements these rapid camp assessments. During the quarterly DTM cycle, assessments are conducted within a six week period which includes activities such as data collection, verification, data-processing and analysis.

The DTM field teams use the DTM v2.0 IDP Site/Camp Information form for each assessment. The teams use various methods, including key respondent interviews with camp managers and camp committees, and observation and physical counting in order to collect the data necessary to complete the form.

DTM also incorporates feedback from partners working in specific sites and carrying out return programs.

In cases where the site cannot be visited for security concerns, IOM uses aerial imagery to determine population estimates. IOM continues to use various methods of data gathering to ensure that the most updated information is available and the field teams approach each individual IDP site in a targeted manner, meaning that the method of data collection can vary depending on the situation of that specific IDP site.

After the data is gathered, consultations are carried out with actors that have a regular presence on the ground, namely, IOM Camp Management Operations (CMO) teams, representatives from the DPC, and other actors carrying out interventions in IDP sites. Google Earth, aerial imagery and other available technology are also used to assist in validating a variety of data, such as location, area of camp sites and also population for the camps that IOM has no access to because of security reasons.

It is important to highlight that IDP individual caseload estimates provided through the DTM are taken from household –level assessments relying on information from representatives of each household.

The returns data, or data on IDP households that received some form of support to leave camps, are sourced from IOM and Cluster partners' databases. The return programs include, but are not limited to home improvements/repairs, retrofitting of existing houses, relocation to rural areas and rental subsidies (presently the main form of support). IOM maintains a database that tracks information on relocated families from the moment IDPs find a suitable lodging that meets some agreed criteria (i.e. environmental risks, MTPTC ratings, access to water and sanitation facilities etc.) to their actual relocation to the house of their choice, to the follow up visits done at the earliest eight (8) weeks after the move, this constituting the final verification before completing the grant disbursement and closing the process.

For more information regarding the methodology utilized for the DTM, including the tools, please contact us at dtmhaiti@iom.int or: <http://iomhaitidataportal.info>.
