ABOUT DTM

The Displacement Tracking Matrix (DTM) is a system that tracks and monitors displacement and population mobility. It is designed to regularly and systematically capture, process and disseminate information to provide a better understanding of the movements and evolving needs of displaced populations, whether on site or en route. For more information about DTM in Afghanistan, please visit www.displacement.iom.int/afghanistan.

In Afghanistan, DTM employs the Baseline Mobility Assessment tool, designed to track mobility, determine the population sizes and locations of forcibly displaced people, reasons for displacement, places of origin, displacement locations and times of displacement, including basic demographics, as well as vulnerabilities and priority needs. Data is collected at the settlement level, through key informant interviews, focus group discussions, and direct observations.

DTM enables IOM and its partners to deliver evidence-based, better targeted, mobility-sensitive and sustainable humanitarian assistance, reintegration, community stabilization and development programming.

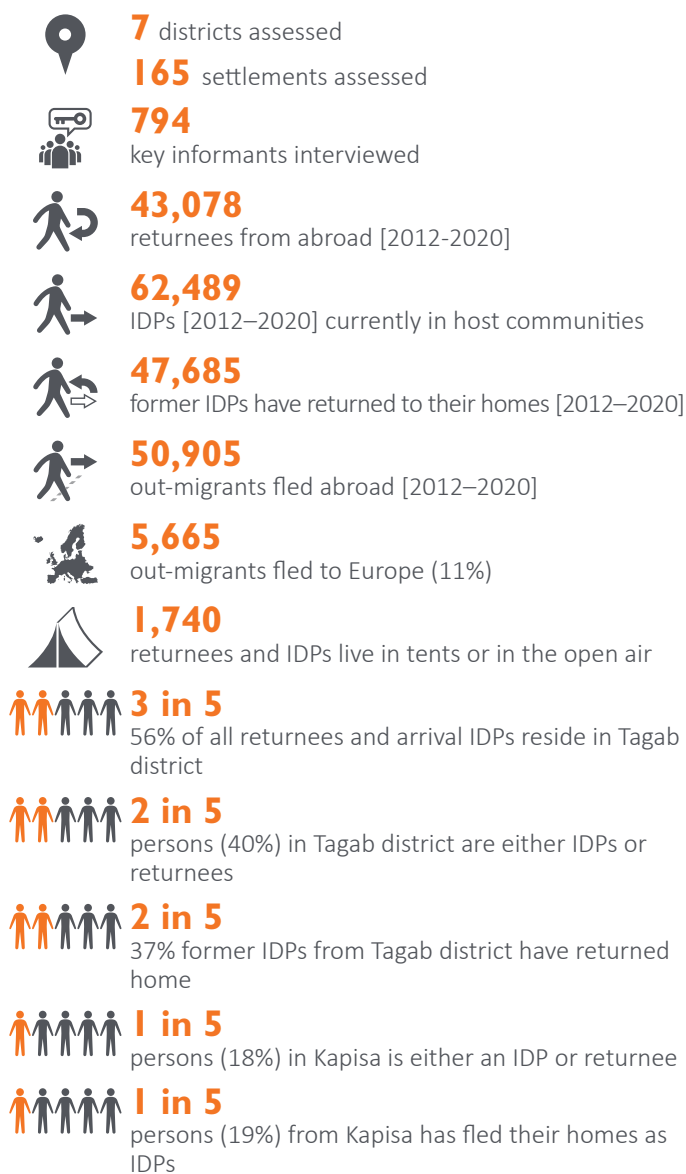

5 TARGET POPULATIONS

Through the Baseline Mobility Assessments, DTM tracks the locations, population sizes, and cross-sectoral needs of five core target population categories:

- 1. Returnees from Abroad**
Afghans who had fled abroad for at least 6 months and have now returned to Afghanistan
 - 2. Out-Migrants**
Afghans who moved or fled abroad
- Internally Displaced Persons (IDPs), subdivided into the following three categories:
- 3. Fled IDPs**
Afghans from an assessed village who fled as IDPs to reside elsewhere in Afghanistan
 - 4. Arrival IDPs**
IDPs from other locations currently residing in an assessed village
 - 5. Returned IDPs**
Afghans from an assessed village who had fled as IDPs in the past and have now returned home

Data on population sizes for the 5 target population categories is collected by time of displacement, using each of the following time frames: 2012-2015 • 2016 • 2017 • 2018 • 2019 • 2020

HIGHLIGHTS

Displaced Individuals in all 5 Target Populations | Summary Overview by District

District	*Base Population	Total Inflow (Returnees + Arrival IDPs)	% of Pop.	Returnees	% of Pop.	Fled IDPs	% of Pop.	Arrival IDPs	% of Pop.	Returned IDPs	% of Pop.	Out Migrants	% of Pop.
Mahmood-e-Raqi	70,206	16,995	19%	8,700	10%	4,105	6%	8,295	10%	3,593	5%	10,912	16%

A lack of educational and economic opportunities has led many IDP and returnee families to engage in hard labour, like these children working hard to support their family, instead of going to school. © IOM 2020

METHODOLOGY

The overall objective of DTM's Baseline Mobility Assessment in Afghanistan is to track mobility and displacement, provide population estimates, locations and geographic distribution of displaced, return and migrant populations, as well as refugees, nomads, cross-border tribal groups, and both domestic and international labour migrants. DTM captures additional mobility information, including reasons for displacement and return, places of origin and destination, times of displacement and return, secondary displacements, and population demographics, vulnerabilities and multi-sectoral needs.

DTM predominantly employs enumerators who originate from the areas of assessment. Enumerators collect quantitative data at the settlement level, through focus group discussions with key informants (KIs). Through direct observations, enumerators also collect qualitative data on living conditions, basic services, and security and socio-economic situation.

Due to security risks, enumerators cannot carry smart-phones or tablets in the field, therefore they collect data, daily, using a paper-based form, which is pre-filled with data from the previous round for verification of existing data and to expedite the assessment process. Completed forms are submitted weekly to the provincial DTM office and verified for accuracy by the team leader and data entry clerk. Once verified, the data is entered electronically via mobile devices, using KoBo forms, and submitted directly into DTM's central SQL server in Kabul, where it is systematically cleaned and verified daily, through automated and manual systems. This stringent review process ensures that DTM data is of the highest quality, accuracy and integrity.

When DTM assesses a province for the first time, enumerators collect data through two rounds of two-layered assessments:

1. District-level assessment (B1): this assessment aims to identify settlements with high inflows and outflows of Afghan nationals and provide estimated numbers of each target population category.
2. Settlement-level assessment (B2): based on the results of B1, this assessment collects information on inflows and outflows of each target population category at each settlement (village), identified through B1. Additional villages are also identified and assessed, based on referrals from KIs.

Since DTM has now assessed all 34 provinces, only settlement-level assessments will be conducted in the future. Pending continued funding, DTM aims to conduct baseline mobility assessments, nationwide, twice per year.

DTM enumerators contribute to the COVID-19 response by disseminating COVID-19 RCCE information/materials in communities during assessments, like this enumerator in Kapisa. © IOM 2020

KEY INFORMANTS

DTM's field enumerators collect data at the settlement level, predominantly through focus group discussions with key informants. While assessing communities, enumerators also observe the living conditions and availability of multi-sectoral services. In the rare case that DTM's District Focal Points cannot physically reach a community, due to insecurity, conflict, or risk of retaliation, DFPs meet the focus groups at safe locations outside their communities or conduct the assessments by phone.

By actively recruiting more female enumerators, though challenging, DTM has made significant strides to improve gender inclusion in focus group discussions, although there is much room for improvement.

794
key informants (KIs) interviewed

- Small/Medium Enterprise Representative
- Agriculture Representative
- Other

RETURNNEES

Returnees are Afghan nationals who have returned to Afghanistan in the assessed location after having spent at least six months abroad. This group includes both documented returnees (Afghans who were registered refugees in host countries and then requested voluntary return with UNHCR and relevant national authorities) and undocumented returnees (Afghans who did not request voluntary return with UNHCR, but rather returned spontaneously from host countries, irrespective of whether or not they were registered refugees with UNHCR and relevant national authorities).

43,078 returnees from abroad

8,018 returned from Pakistan (19%)

39,188 undocumented returnees from Pakistan + Iran (91%)

32,946 returned from Iran (76%)

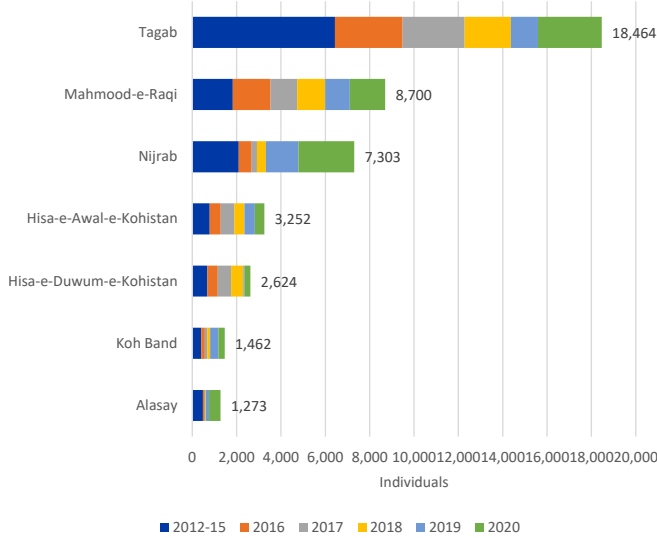

1,776 documented returnees from Pakistan + Iran (4%)

2,114 returnees from non-neighbouring countries (5%)

Returnees from Abroad by District | Kapisa

Returnees from Europe & Turkey | Annual Trends | Kapisa

ARRIVAL IDPs

Arrival IDPs (IDPs) are Afghans who fled from other settlements in Afghanistan and have arrived and presently reside at the assessed location / host community, as a result of, or in order to avoid, the effects of armed conflict, generalized violence, human rights violations, protection concerns, or natural and human-made disasters.

62,489
IDPs currently reside in host communities

96%
displaced due to conflict

41,069
IDPs in Tagab district, which hosts the most IDPs (66%)

4%
displaced due to natural disaster

0
IDPs reside in informal settlements

94%
displaced within their home province

Total Inflow (Returnees + IDPs) | Kapisa

Total Inflow (Returnees + IDPs) | Summary by District

District	Returnees	Arrival IDPs	Total Inflow
Tagab	18,464	41,069	59,533
Mahmood-e-Raqi	8,700	8,295	16,995
Nijrab	7,303	6,832	14,135
Hisa Awal Kohistan	3,252	2,084	5,336
Hisa Duwum Kohistan	2,624	1,920	4,544
Koh Band	1,462	2,177	3,639
Alasay	1,273	112	1,385
Grand Total	43,078	62,489	105,567

Overall, Kapisa province hosts a total inflow of 105,567 returnees and IDPs, of which 41% (43,078) are returnees and 59% (62,489) are IDPs. The table below shows the 40 settlements in Kapisa that are most affected by this influx. These 40 settlements (24% of the 165 settlements assessed in Kapisa) host 73% of the province’s returnees and IDPs. These communities are especially fragile and susceptible to social instability induced by this large influx and the subsequent competition for limited, already overstretched resources and job opportunities.

Top 40 settlements hosting the most Returnees + IDPs
