

A lack of economic and educational opportunities have led children to engage in hard labour, like these children in Bamyan. © IOM 2020

ABOUT DTM

The Displacement Tracking Matrix (DTM) is a system that tracks and monitors displacement and population mobility. It is designed to regularly and systematically capture, process and disseminate information to provide a better understanding of the movements and evolving needs of displaced populations, whether on site or en route.

DTM implements the Baseline Mobility Assessment in Afghanistan to track mobility, provide information on population estimates, locations and geographic distribution of displaced, return and migrant populations, reasons for displacement, places of origin, and times of displacement, including demographics, vulnerabilities and multi-sectoral needs. Data is collected at the settlement level, through community focus group discussions with key informants and direct observations.

DTM enables IOM and its partners to maximize resources, set priorities, and deliver better-targeted, evidence-based, mobility-sensitive and sustainable humanitarian assistance and development programming. For more information about DTM in Afghanistan, please visit www.displacement.iom.int-afghanistan.

5 TARGET POPULATIONS

Through the Baseline Mobility Assessments, DTM tracks the locations, population sizes, and cross-sectoral needs of five core target population categories:

- 1. Returnees from Abroad**
Afghans who had fled abroad for at least 6 months and have now returned to Afghanistan
 - 2. Out-Migrants**
Afghans who moved or fled abroad
- Internally Displaced Persons (IDPs), subdivided into the following three categories:
- 3. Fled IDPs**
Afghans from an assessed village who fled as IDPs to reside elsewhere in Afghanistan
 - 4. Arrival IDPs**
IDPs from other locations currently residing in an assessed village
 - 5. Returned IDPs**
Afghans from an assessed village who had fled as IDPs in the past and have now returned home

Data on population sizes for the 5 target population categories is collected by time of displacement, using each of the following time frames: 2012-2015 • 2016 • 2017 • 2018. • 2019 • 2020

HIGHLIGHTS

-  **34** provinces covered
-  **401** districts assessed
-  **12,600** settlements assessed
-  **72,305** key informants interviewed
-  **4,196,878** returnees from abroad [2012-2020]
-  **4,937,277** IDPs [2012-2020] currently in host communities
-  **5,766,941** former IDPs have returned to their homes [2012-2020]
-  **3,022,889** out-migrants fled abroad [2012-2020]
-  **399,954** out-migrants fled to Europe (13% of out-migrants)
-  **284,643** returnees and IDPs (3%) live in tents or in the open air
-  **2 in 3** 63% of IDPs reside in 8 provinces: Badghis, Balkh, Helmand, Herat, Kabul, Kandahar, Nangarhar & Zabul
-  **1 in 2** 49% of returnees reside in 8 provinces: Baghlan, Balkh, Faryab, Herat, Jawzjan, Kabul, Kunduz & Nangarhar
-  **1 in 3** persons in Farah, Helmand, Herat, Jawzjan, Kunar, Logar & Nangarhar and over 40% in Badghis, Nimroz & Zabul are either an IDP or returnee
-  **2 in 5** persons in Badghis, Uruzgan & Wardak and 50% in Farah & Zabul have fled their homes as IDPs
-  **1 in 2** former IDPs from Baghlan, Helmand, Kunduz, Takhar & Zabul have returned home

METHODOLOGY

The overall objective of DTM's Baseline Mobility Assessment in Afghanistan is to track mobility and displacement, provide population estimates, locations and geographic distribution of displaced, return and migrant populations, as well as refugees, nomads, cross-border tribal groups, and both domestic and international labour migrants. DTM captures additional mobility information, including reasons for displacement and return, places of origin and destination, times of displacement and return, secondary displacements, and population demographics, vulnerabilities and multi-sectoral needs.

DTM predominantly employs enumerators who originate from the areas of assessment. Enumerators collect quantitative data at the settlement level, through focus group discussions with key informants (KIs). Through direct observations, enumerators also collect qualitative data on living conditions, basic services, and security and socio-economic situation.

Due to security risks, enumerators cannot carry smart-phones or tablets in the field, therefore they collect data, daily, using a paper-based form, which is pre-filled with data from the previous round for verification of existing data and to expedite the assessment process. Completed forms are submitted weekly to the provincial DTM office and verified for accuracy by the team leader and data entry clerk. Once verified, the data is entered electronically via mobile devices, using KoBo forms, and submitted directly into DTM's central SQL server in Kabul, where it is systematically cleaned and verified daily, through automated and manual systems. This stringent review process ensures that DTM data is of the highest quality, accuracy and integrity.

When DTM assesses a province for the first time, enumerators collect data through two rounds of two-layered assessments:

1. District-level assessment (B1): this assessment aims to identify settlements with high inflows and outflows of Afghan nationals and provide estimated numbers of each target population category.
2. Settlement-level assessment (B2): based on the results of B1, this assessment collects information on inflows and outflows of each target population category at each settlement (village), identified through B1. Additional villages are also identified and assessed, based on referrals from KIs.

Since DTM has assessed all 34 provinces, only settlement-level assessments will be conducted in the future. Pending continued funding, DTM aims to conduct baseline mobility assessments, nationwide, twice per year.

As female enumerators attain greater female participation in focus groups, DTM strives to employ more female enumerators to collect gender-balanced information. © IOM 2020

KEY INFORMANTS

DTM's field enumerators collect data at the settlement level, predominantly through community focus group discussions with key informants. While assessing communities, enumerators also observe the living conditions and availability of multi-sectoral services. In the rare case that DTM's District Focal Points cannot physically reach a community, due to insecurity, conflict, or risk of retaliation, DFPs meet the focus groups at safe locations outside their communities or conduct the assessments by phone.

By actively recruiting more female enumerators, though challenging, DTM has made significant strides to improve gender inclusion in focus group discussions, although there is much room for improvement. Women represent only 3% of the key informants, which, although marginal, is an improvement from the 0.1% female representation in DTM's first round, completed in March 2017.

	72,305 key informants (KIs) interviewed		8,794 key informants are IDPs or returnees (12%)
	2,459 female key informants (3%)		17,550 KIs from host communities (24%)
	69,846 male key informants (97%)		23,796 KIs from multi-sectoral and social services (33%)
	5.7 average number of KIs per focus group		19,435 KIs from local authorities (27%)

RETURNNEES

Returnees are Afghan nationals who have returned to Afghanistan in the assessed location after having spent at least six months abroad. This includes both documented returnees (Afghans who were registered refugees in host countries and requested voluntary return with UNHCR and relevant national authorities) and undocumented returnees (Afghans who returned spontaneously or were deported from host countries, irrespective of whether or not they were registered refugees with UNHCR and relevant national authorities).

Since 2016, the number of returnees has significantly decreased each year, although returns from Europe marginally increased. Nangarhar province received 13% of all returnees, nationwide.

4,196,878
returnees from abroad

2,218,478
returned from Pakistan (53%)

2,678,251
undocumented returnees from Pakistan + Iran (64%)

1,721,661
returned from Iran (41%)

1,261,888
documented returnees from Pakistan + Iran (30%)

256,739
returnees from non-neighbouring countries (6%)

Returnees from Abroad | Overall | Country/Region of Origin

Returnees from Abroad by Province | Annual Trends

Returnees from Europe & Turkey | Annual Trends

Returnees from Pakistan & Iran | Annual Trends

ARRIVAL IDPs

Arrival IDPs (IDPs) are Afghans who fled from other settlements in Afghanistan and have arrived and presently reside at the assessed location- host community, as a result of, or in order to avoid, the effects of armed conflict, generalized violence, human rights violations, protection concerns, or natural and human-made disasters.

2016 through 2018 saw record numbers of Afghans displaced by conflict and natural disasters, with about 1 million displaced each year, based on our key informants' estimates. In comparison to 2017, the overall number of IDPs increased only slightly in 2018, but decreased by 26% in 2019 and increased again by 16% in 2020. In 2020, Jawzjan, Kapisa, Paktika, Wardak and Zabul show a sharp increase in the number of IDPs, most likely due to Afghans fleeing to safer areas to escape the ongoing armed conflicts. Herat is the most critically affected province, hosting 19% of all IDPs, nationwide.

4,937,277
IDPs currently reside in host communities

3,858,752
displaced due to conflict (78%)

954,878
IDPs in Herat, which hosts the most IDPs

1,078,525
displaced by natural disaster (22%)

283,028
IDPs reside in informal settlements (6%)

2 in 3
displaced within their home province (64%)

The top 25 districts hosting the greatest numbers of returnees and IDPs (total inflow) are listed below. These districts are potentially susceptible to social instability induced by large influxes of returnees and IDPs, who face limited access to basic services and livelihoods, jeopardizing reintegration prospects and fuelling secondary displacement. Nationwide, Herat province hosts the most conflict-displaced and natural disaster displaced IDPs (954,878), 63% of whom were displaced by conflict and 37% by natural disaster, with the majority of IDPs (320,177) residing in urban Herat district. Nangarhar hosts the most returnees (558,361), with the majority of returnees (127,153) residing in Behsud district.

FLED IDPS

Fled IDPs are Afghans who have fled from an assessed location or settlement within which they previously resided and now currently reside in a different settlement in Afghanistan, as a result of, or in order to avoid, the effects of armed conflict, generalized violence, human rights violations, protection concerns, or natural and human-made disasters.

- 5,225,576** fled as IDPs and have not yet returned to their homes
- 2 in 3** fled to locations in their home province (68%)
- 3,619,954** displaced due to conflict (69%)
- 1,605,622** displaced by natural disaster (31%)

RETURNED IDPS

Returned IDPs are Afghans who have returned to their home or place of origin in the assessed location or settlement from which they had fled as IDPs in the past, as a result of, or in order to avoid, the effects of armed conflict, generalized violence, human rights violations, protection concerns, or natural and human-made disasters.

- 5,766,941** persons have been IDPs and returned home
- over 85%** of IDPs from Logar, Laghman & Wardak have not returned home
- 4 in 5** returned from other locations within their home province (83%)
- 1 in 4** 24% of all returned IDPs returned to Kunduz province

OUT-MIGRANTS

Out-Migrants are Afghans who have moved or fled abroad from the assessed location, whatever the cause, reason or duration of expatriation. This category includes refugees, displaced and uprooted people, and economic migrants who have left Afghanistan.

Since 2015, there has been a steady decline in outward migration, likely as a result of economic decline and diminishing protection space in Iran and Pakistan and increased returns from Europe. Key informants estimate that, since 2012, an astounding 309,131 Afghans moved abroad from Faryab, likely due to years of ongoing conflict and resultant underdevelopment, loss of livelihoods and ensuing poverty.

3,022,889
fled abroad

399,954
fled to Europe (13%)

1,925,942
fled to Iran (64%)

607,868
fled to Pakistan (20%)

▶▶ MULTI-SECTORAL NEEDS

792,605 IDPs and returnees lack access to safe drinking water. Like this village in Jawzjan, communities often resort to fetching drinking water from unprotected, open water sources. © IOM 2020

283,028 IDPs live in tents under very poor living conditions in informal settlements, like these families in Herat. © IOM 2020

A lack of access to drinking water sources plus environmental conditions make lives difficult for IDP and returnee families, like these children carrying water from a long distance in a very cold winter in Bamyan. © IOM 2020

Like these children in Baghlan, children often travel long distances to fetch water for their families, which poses protection risks. © IOM 2020

Many IDP and returnee children, like these boys and girls studying together in Baghlan, have to study in open air or tents without access to essential education facilities. © IOM 2020

Shelter needs are high with 284,643 returnees and IDPs living in tents or open air under very poor living conditions, like these families in Logar. © IOM 2020

DTM enumerators contribute to the COVID-19 response by disseminating COVID-19 RCCE information in communities during assessments, like this enumerator in Khost. © IOM 2020

As depicted below, a lack of waterfall during the winter this year is already showing the signs for a severe drought which will eventually affect agriculture, livestock and livelihood opportunities. © IOM 2020

STORIES FROM THE DISPLACED

Hussain: Business Startup and Reintegration

Hussain is a 23 year old returnee, who is originally from Ghazni. He migrated to Iran four years ago and worked hard in informal labour for two years to earn the transportation cost for his journey to Europe. Hussain travelled to Turkey and wanted to proceed to Greece but could not cross the border between Turkey and Greece.

“As an irregular migrant, I faced a lot of difficulties and challenges in the way, as well as, in Turkey but could not proceed my journey toward Europe due to border closure and strict monitoring by the border police.”

Hussain returned to Afghanistan after staying for one year in Turkey. With the money he earned abroad, Hussain started a strawberry farm in his district.

“I did not have enough experience in farming. I reached out to other farmers to take their opinions about starting up a strawberry farm, but no one had enough experience about strawberry farming. Then I referred to online sources and learned about strawberry farming.”

Hussain finally invested USD 2,500 to start a strawberry greenhouse. He has been very successful in his business. Hussain earned USD 2.5 to USD 3 from each kilogram of strawberry this year. He plans to set up more strawberry farms in the province and double his revenue by the next year.

**Please note that the names have been changed and village locations have been kept anonymous to protect the identity of the interviewee.*

Hussain, a returnee from Turkey, has successfully integrated in the community by starting a strawberry farm. © IOM 2020
