MOSUL OPERATIONS DATA SNAPSHOT: 15 JANUARY 2017

The Emergency Tracking (ET) system is a crisis-based tool that aims at tracking sudden displacement or return movements triggered by specific crises. The ET figures reported on this portal are not cumulative of the all persons affected by the Mosul crisis thus far, rather the ET update provides only a snapshot of the current displacement situation for the indicated date. The data and information reported on this page are related solely to the displacement caused by the Mosul operations which started on 17 October 2016.

NUMBER OF DISPLACED INDIVIDUALS IDENTIFIED BY EMERGENCY TRACKING SINCE 17 OCTOBER
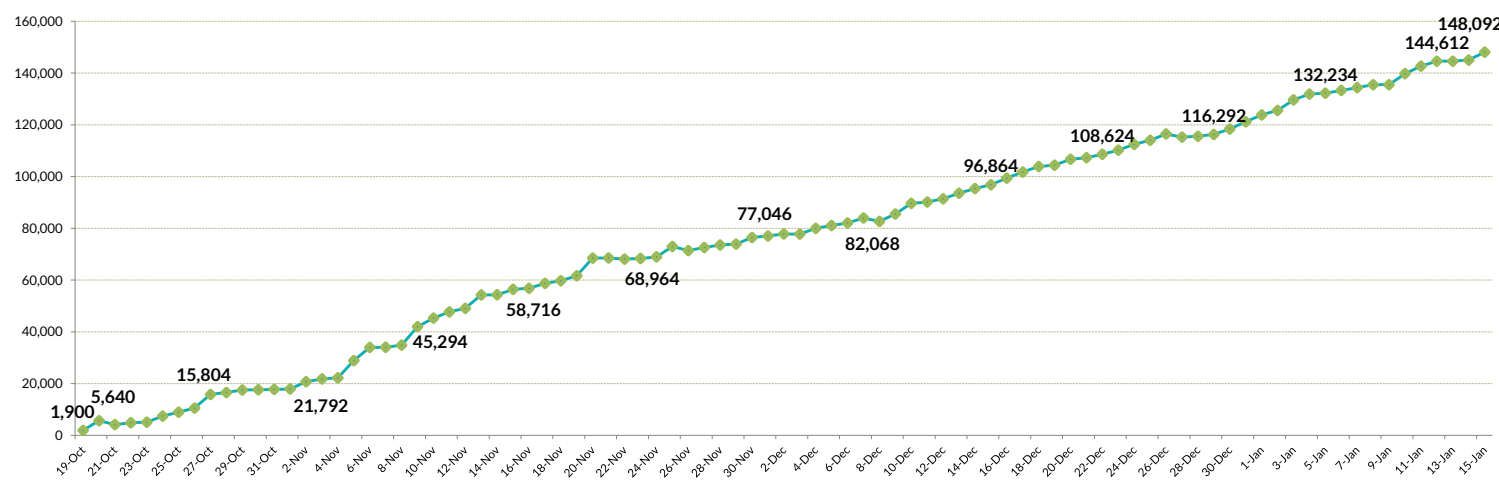

On 14 January:

- Nargizlia1 Camp received approximately 20 families from Merkaz Tilkaif and Merkaz Mosul sub-districts;
- Approximately 56 families from Merkaz Mosul sub-district reached Haj Ali camp;
- The increase of 430 IDP families in Qayyarah Airstrip emergency site is not due to new arrivals. The number of families who were still waiting for a plot to be allocated has been included in the total number of IDPs in the emergency site.

*Emergency tracking numbers are not cumulative. They reflect a snapshot of displacement on the day of reporting. The number of individuals is calculated by multiplying the number of identified families by six, which is the average size of an Iraqi family.

The IOM Iraq Displacement Tracking Matrix (DTM) is the standard data source being used in Iraq to guide the humanitarian response. Emergency tracking for the Mosul operations began identifying people displaced resulting from military actions that began on 17 October.
