

The objective of the Emergency Tracking Tool (ETT) - Movement Alert is to collect information on large and sudden population movements, and to provide support to the Government and the humanitarian community by disseminating data on IDPs for informing effective humanitarian response to the affected population. Information is collected through key informant interviews or direct observation. The dashboard provides basic information on displacements recorded in Mueda district in the 2nd of August. This ETT Movement Alert forms part of a larger exercise in mapping displacement trends on a weekly basis. Reported findings complement information obtained through other DTM data collection activities in the country. Additional information is available upon request.

MOVEMENT ALERT

SUMMARY OF THE EVENT

Following the recent attacks in Muidumbe and Nangade districts, DTM teams in Ancuabe, Namuno, Balama, Chiure, Ibo, Mueda, Montepuez, Nangade, Metuge, Mecufi, and Cidade de Pemba continue to observe movements amongst displaced populations. In the district of Mueda, a significant rise in IDP arrivals have been recorded on 2 of August 2021. An estimated 763 individuals have arrived to these districts, with children constituting a majority (51%) of the movement. In addition, 27 elderly persons were recorded during the assessments.
