

Context: The Central Sahel area, and in particular the Liptako Gourma region, which borders Burkina Faso, Mali and Niger, is affected by a complex crisis involving growing competition over dwindling resources; climatic variability; demographic pressure; high levels of poverty; disaffection and a lack of livelihood opportunities; communal tensions; the absence of state institutions and basic services; and

violence related to organized crime and Non-State Armed Groups. The crisis has led to the death of an estimated 5,000 people in 2020 (as of 31 August) and triggered significant displacement of populations in the four affected countries. As of 28 July 2021, 2,003,986 individuals have been displaced, including 1,820,783 Internally Displaced Persons (91% of the displaced population) and 183,203 Refugees

(9% of the displaced population). Sixty-seven per cent of the displaced population (1,333,913 individuals) were located in Burkina Faso, while 20 per cent resided in Mali (400,311 individuals), 10 per cent in Niger (199,385 individuals) and 4 per cent in Mauritania (70,377 individuals).

NB: Displacements may also be linked to the crisis affecting Northern Mali since 2012.
