0 Returnee HHs

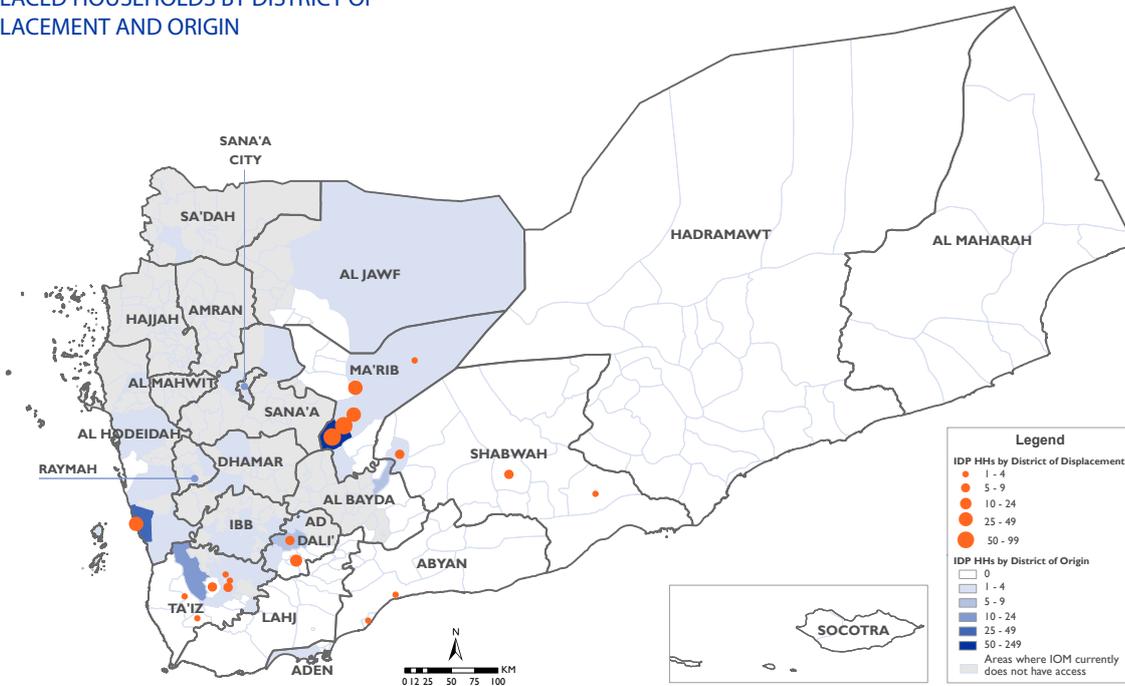

IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on numbers of households forced to flee on a daily basis from their locations of origin or displacement, allowing for regular reporting of new displacements in terms of numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of origin.

During the reporting period, between 05 and 11 September 2021, IOM Yemen DTM tracked 385 households (HH) (2,310 individuals) displaced at least once. Conflict was the main reason for displacement, accounting for 97 per cent (373 HH) of the total, followed by economic reasons, accounting for three per cent (12 HH). From 01 January to 11 September 2021, IOM Yemen DTM estimates that 10,164 households (60,984 Individuals) have experienced displacement at least once.

Some 140 HH were displaced in the previous reporting period, which covered 29 August - 04 September 2021. However, they were only identified in the current period and so, this figure has been added to the cumulative displacement total recorded from the beginning of the year.
