0 Returnee HHs

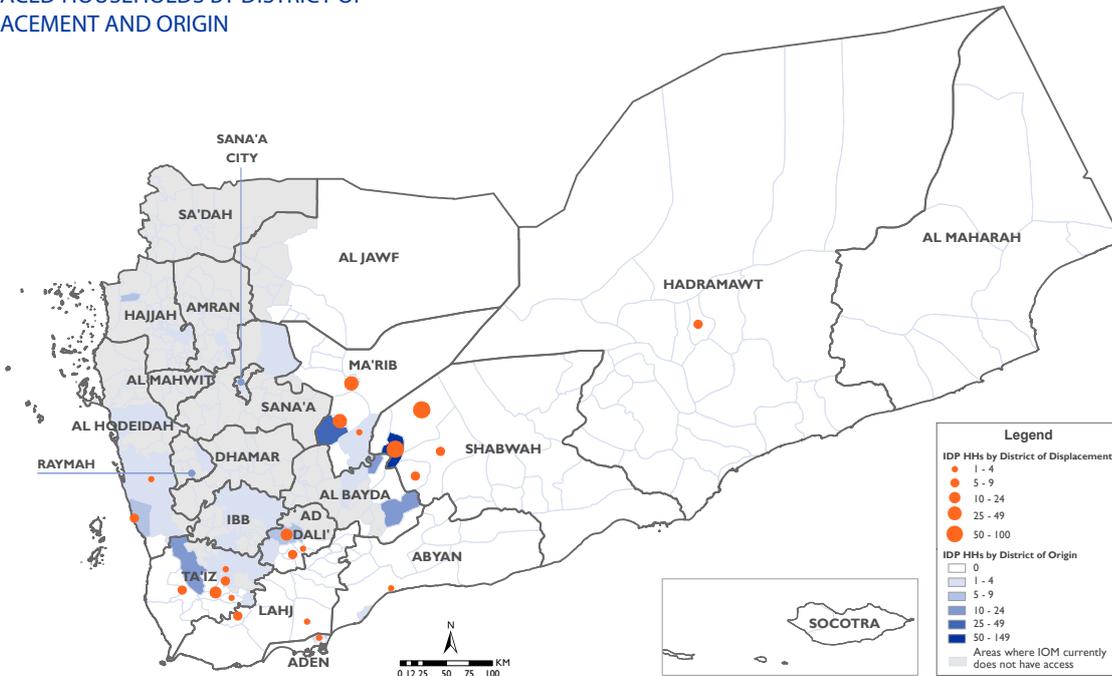

IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on numbers of households forced to flee on a daily basis from their locations of origin or displacement, allowing for regular reporting of new displacements in terms of numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of origin.

During the reporting period, between 12 and 18 September 2021, IOM Yemen DTM tracked 328 households (HH) (1,968 individuals) displaced at least once. Conflict was the main reason for displacement, accounting for 98 per cent (323 HH) of the total, followed by economic reasons, accounting for less than two per cent (5 HH). From 01 January to 18 September 2021, IOM Yemen DTM estimates that 10,516 households (63,096 Individuals) have experienced displacement at least once.

Some 24 HH displaced in the previous reporting period, which covered 05 - 11 September 2021, were only identified in the current period and so, this figure has been added to the cumulative displacement total recorded from the beginning of the year.
