

635 IDP HHs

0 Returnee HHs

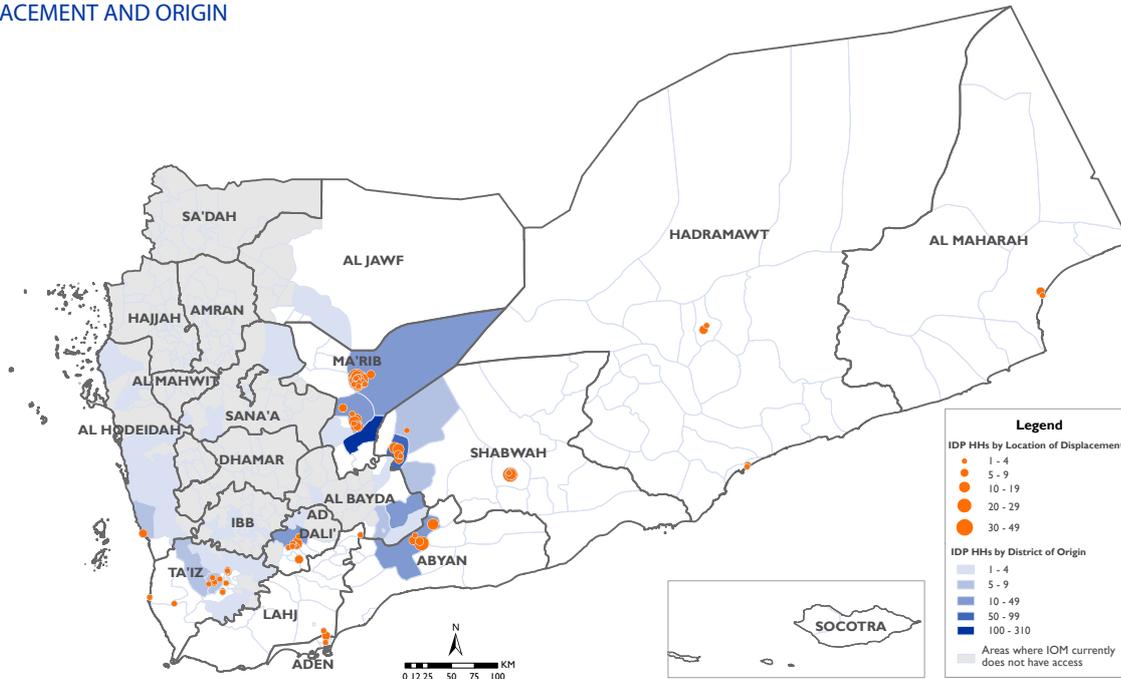

IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on numbers of households forced to flee on a daily basis from their locations of origin or displacement, allowing for regular reporting of new displacements in terms of numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of origin.

During the reporting period, between 19 and 25 September 2021, IOM Yemen DTM tracked 635 households (HH) (3,810 individuals) displaced at least once. Conflict was the main reason for displacement, accounting for 98 per cent (621 HH) of the total, followed by economic reasons, accounting for two per cent (14 HH). From 01 January to 25 September 2021, IOM Yemen DTM estimates that 11,186 households (67,116 Individuals) have experienced displacement at least once.

Some 35 HH displaced in the previous reporting period, which covered 12 - 18 September 2021, were only identified in the current period and so, this figure has been added to the cumulative displacement total recorded from the beginning of the year.
