

The objective of the Emergency Tracking Tool (ETT) - Movement Alert is to collect information on large and sudden population movements, and to provide support to the Government and the humanitarian community by disseminating data on IDPs for informing effective humanitarian response to the affected population. Information is collected through key informant interviews or direct observation. The dashboard provides basic information on displacements recorded in Mueda district in 12th of October. This ETT Movement Alert forms part of a larger exercise in mapping displacement trends on a weekly basis. Reported findings complement information obtained through other DTM data collection activities in the country. Additional information is available upon request.

## MOVEMENT ALERT

### SUMMARY OF THE EVENT

DTM teams in Mueda reported a significant rise in IDP departures from host community to relocation sites. In the 12th October 2021, an estimated 1,258 individuals have been spontaneously relocated from the locality of Mpeme to Mpeme relocation site in Mueda district, with children constituting a majority (63%) of the displaced population. In addition, 26 elderly were recorded during the assessments.
