## FLOW MONITORING • IRAN

DASHBOARD • 01 OCT 2019 - 30 SEP 2020

DTM's Flow Monitoring quantifies population inflows and outflows, as well as demographics, travel intentions, origins, destinations and needs of migrants, returnees and other cross-border, mobile populations, thereby informing preparedness and response planning at borders and at places of origin. DTM collects data at Flow Monitoring Points through interviews with both individual travellers and those travelling in groups. Flow Monitoring provides information on the flows of migrants to and from Afghanistan, Pakistan, Tajikistan, Uzbekistan, Turkmenistan and Iran, including those who have previously lived abroad as refugees and migrants, have returned to Afghanistan, and are re-migrating abroad again.
