

The objective of the Emergency Tracking Tool (ETT) - Movement Alert is to collect information on large and sudden population movements, and to provide support to the Government and the humanitarian community by disseminating data on IDPs for informing effective humanitarian response to the affected population. Information is collected through key informant interviews or direct observation. The dashboard provides basic information on displacements recorded in Mueda district between 4th to 8th November. This ETT Movement Alert forms part of a larger exercise in mapping displacement trends on a weekly basis. Reported findings complement information obtained through other DTM data collection activities in the country. Additional information is available upon request.

## MOVEMENT ALERT (IDPS RETURNING TO DISTRICT OF ORIGIN)

### SUMMARY OF THE EVENT

From 4-8 November, DTM teams observed the arrival of 2,159 IDPs, in transit, reporting their intention to return to their places of origin in Palma district. According to reports received from arrivals in Vila de Mueda, the majority of the intended returnees are coming from the Ntele Relocation site in Montepuez district. Of these recorded movements, children constitute the majority of the travellers (46%). An estimated 31 elderly travellers were additionally reported within these observed movements.
