

IOM's Displacement Tracking Matrix (DTM) continued conducting Displacement Site Flow Monitoring (DSFM) at Wau Masna Collective Centre. In the second quarter of 2021 (April – June), 1,454 interviews were conducted, representing 3,571 individual movements. This quarter recorded a 73 per cent decrease in surveyed day movements, as people travel in and out of the camp to pursue livelihood activities including farming / fishing (15%), to make purchases (10%), make / sell charcoal (9%), and to access healthcare services (9%). Longer temporary movements were primarily for farming or fishing activities (32%), visiting friends or family (20%), and avoiding the congested site due to concerns of COVID-19 (9%), with 51 per cent lasting more than six months. Masna recorded an increased number of new arrivals (284) between April and June compared to 53 in the previous quarter, 86 per cent of whom came because of insecurity / conflict related issues. DTM encountered only three persons intending to permanently leave the collective centre during the second quarter of 2021.

**Methodology:**  
Displacement Site Flow Monitoring (DSFM) involves interviewing a cross-section of persons passing through the site's entry and exit points. DTM aims to provide partners with a better understanding of mobility dynamics into and out of the sites categorized as same-day movement, temporary (overnight) travel, new entries and (intended) permanent exits. Interviews are conducted seven days a week from 8 a.m. to 5 p.m. DSFM provides indicative traveller profiles rather than comprehensive or representative estimates.

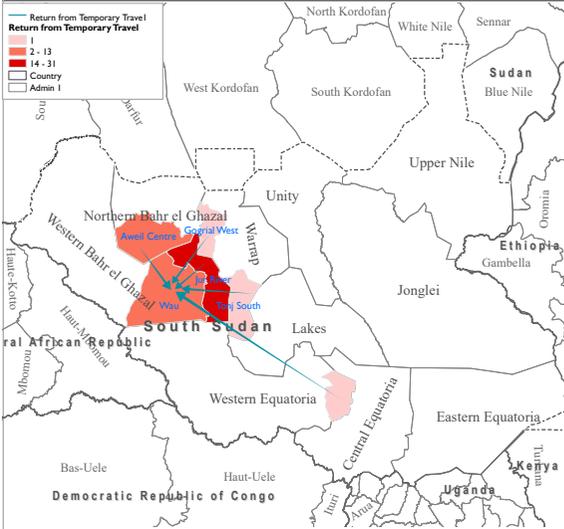

<b>June Population Count</b>		<b>2,732 ind. (740 households)</b>		<b>1,338 (49%) Male</b>		<b>1,394 (51%) Female</b>																
<b>Same-Day Travel</b> n = 2,945 		<b>Temporary Travel</b> n = 339 		<b>New Arrivals</b> n = 284 		<b>Permanent Exits</b> n = 3
