

During the reporting period (10 to 16 November 2021), a total of 58 movements were recorded - 40 arrivals (5,853 individuals), 14 departures (161 individuals), 2 transits (63 individuals), and 2 intended return movements (87 individuals). The largest arrivals were recorded in Mueda (3,139 individuals), Ancuabe (2,204 individuals) and Nangade (382 individuals). The largest departure was recorded in Mueda (85 individuals). The largest transit was recorded in Mueda (63 individuals). The intended return movements were observed in Montepuez (15 individuals), Balama (11 individuals), Mueda (148 individuals) and Nangade (72 individuals). Less than one quarter of the total population (15%) were displaced for the first time. An estimated 75 per cent of reported IDPs had been displaced more than once prior to this latest movement.

ABOUT THE EMERGENCY TRACKING TOOL (ETT)

Due to the volume and fluidity of population movements in Cabo Delgado and Nampula, IOM's Displacement Tracking Matrix (DTM) rolled out its Emergency Tracking Tool (ETT) methodology in key areas presenting rapid and important movements of populations, in order to ensure the tracking of population on the move and to identify areas of displacement and settlements, and support the identification of critical needs. Mapping displacement trends on a weekly basis complements the information obtained through other activities of the DTM data collection in the country.

The objective of the Emergency Tracking Tool (ETT) is to collect information on large and sudden population movements. Findings from the Emergency Tracking tool aim to provide support to the Government and the humanitarian community by disseminating data on IDPs for effective humanitarian response planning amongst affected populations.

Emergency tracking teams and enumerators are deployed to Ancuabe, Namuno, Balama, Chiure, Ibo, Mueda, Nangade, Montepuez, Meluco, Mecufi, and Cidade de Pemba districts to collect data on displacement movements on a daily basis. Due to recent attacks, the DTM team has temporarily stopped assessments in Macomia, Muidumbe, Palma and Mocimboa da Praia districts.

VULNERABILITIES BY LOCALITY (ARRIVALS)

District/Locality	Total number of individuals	Unaccompanied / separated children	Pregnant women	Elderly	People with disability	People with chronic disease
