### Overview

This document represents a summary snapshot of monitoring activities conducted by IOM and border monitoring partners at the border between Haiti and the Dominican Republic. The monitoring was put in place following the movements observed at the border before and after the 17<sup>th</sup> June 2015 expiration of the registration component of the National Plan for the Regularization of Foreigners (PNRE<sup>1</sup> in Spanish), established in the Dominican Republic. Monitoring of border movements began as of the first week of June 2015. Up until the 16<sup>th</sup> of June, figures are based on partial observations of border crossing points. The network was 100% operational as of July 2015.

<sup>2</sup> Individuals are registered each time they enter Haiti. The figures reflected in this report include 404 individuals who have been registered twice.

<sup>3</sup> All figures in this SitRep reflect information gathered on a voluntary basis from returnees, and therefore may not be representative of the totality of returns.

<sup>4</sup> The figures of official deportations are as of 15<sup>th</sup> August 2015.

<sup>5</sup> The figures used in the graph are based on data entry already completed and do not reflect the total figures observed (average time for completion is 2 weeks). However, there has been a significant decrease in figures related to official deportations, as returnees are more and more refusing to register with the network.

Official deportations are mostly carried out by the DR Immigration (DGM).

**Other Deportations:** Any forceful return which does not follow the aforementioned guidelines.

This report has been made possible through the funding support received from the Bureau of Population, Refugees and Migration (PRM) and the Office for the Coordination of Humanitarian Affairs (OCHA).

<sup>6</sup> The data entered this week is low because most of IOM staff were involved in an IDP registration exercise.

<sup>7</sup> The difference between the previous SitRep and the current one is higher because the data is based on date of entry into Haiti and not date of data entry into the database.

<sup>8</sup> The figures represented in this table correspond to the individuals who accepted voluntarily to be registered between the period from Thursday 10<sup>th</sup> March to Wednesday 16<sup>th</sup> March 2016.
