ABOUT THE EMERGENCY TRACKING TOOL (ETT)

Due to the volume and fluidity of population movements in Cabo Delgado, IOM's Displacement Tracking Matrix (DTM) rolled out its Emergency Tracking Tool (ETT) methodology in key areas presenting rapid and important movements of populations, in order to ensure the tracking of population on the move and to identify areas of displacement and settlements, and support the identification of critical needs. Mapping displacement trends on a weekly basis complements the information obtained through other activities of the DTM data collection in the country.

The objective of the Emergency Tracking Tool (ETT) is to collect information on large and sudden population movements. Findings from the Emergency Tracking tool aim to provide support to the Government and the humanitarian community by disseminating data on IDPs for effective humanitarian response planning amongst affected populations.

Emergency tracking teams and enumerators are deployed in the Provinces of Cabo Delgado (Ancuabe, Namuno, Balama, Chiure, Ibo, Mueda, Nangade, Montepuez, Mecufi, and Cidade de Pemba districts) and Nampula (Meconta) to collect data on displacement movements on a daily basis. Due to recent attacks, the DTM team has temporarily stopped assessments in Macomia, Muidumbe, Palma and Mocimboa da Praia districts.

VULNERABILITIES BY LOCALITY

District/Locality	Total number of individuals	Pregnant women	Elderly	People with disability
Erati	676	1	-	-
Alua Sede	49	-	-	-
Erati	627	1	-	-
Meconta	547	6	13	4
