0 Returnee HHs

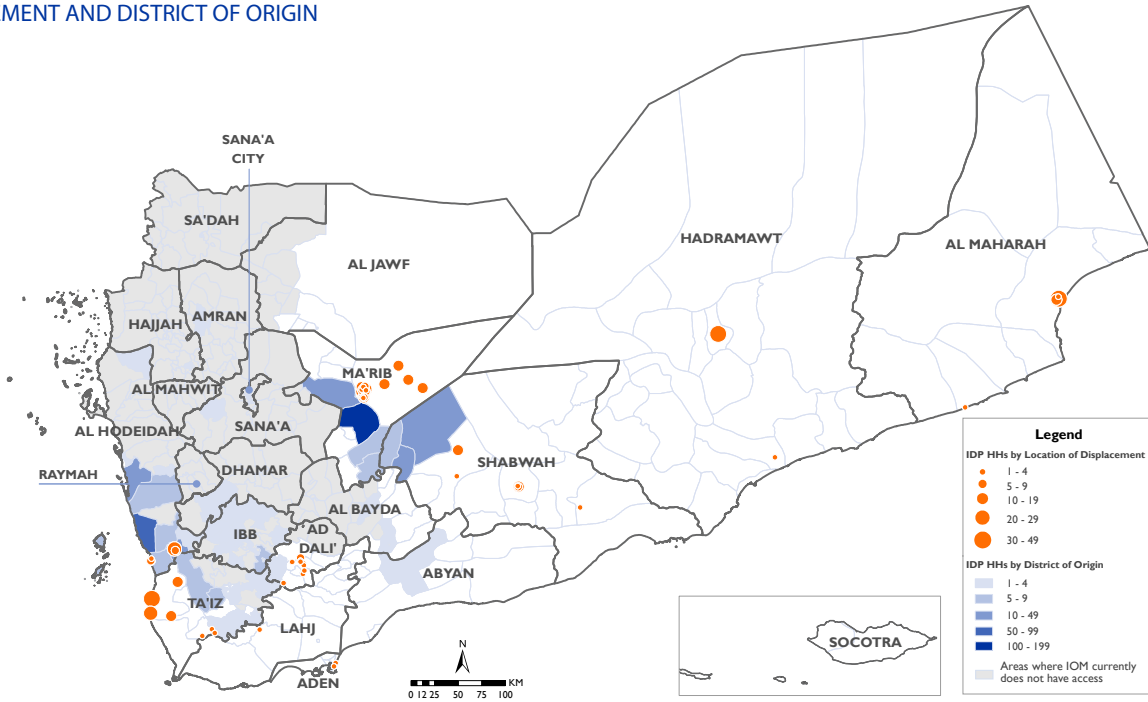

IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on numbers of households forced to flee on a daily basis from their locations of origin or displacement, allowing for regular reporting of new displacements in terms of numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of origin.

During the reporting period, between 14 and 20 November 2021, IOM Yemen DTM tracked 497 households (HH) (2,982 individuals) displaced at least once. Conflict was the main reason for displacement, accounting for 97 per cent (481 HH) of the total, followed by economic reasons, accounting for three per cent (16 HH). From 01 January to 20 November 2021, IOM Yemen DTM estimates that 21,007 households (126,042 individuals) have experienced displacement at least once.

Some 616 HH displaced in the previous reporting period, which covered (07 November - 13 November 2021), in the governorates of Marib (423 HH), Taiz (113 HH), Al Maharah (70 HH), Abyan (4 HH), Aden (3 HH), and Lahj (3 HH), were only identified in the current reporting period. This figure has been added to the cumulative displacement total recorded from the beginning of the year.
