Demographics

Vulnerabilities

It is reported that the arriving IDPs have maize meals, cooking oil, beans, and salt. These food distributions have been organised by the provincial INGD between 14 - 16 December 2021. The two groups of IDPs who arrived on 24 December are using a shared/common kitchen due to limited quantities of food stuffs. The nearest health centre is approximately one kilometre away from the temporary centres. In 16 de Junho Primary School, there is only one manual water supply on the premises. For their laundry needs, IDPs go to the nearby stream. The IDPs are accommodated in school classrooms, with no privacy possible.
