

During the reporting period (23 to 28 December 2021), a total of 16 movements were recorded - 6 transits (115 individuals), 2 departures (33 individuals), 4 arrivals (26 individuals), and 4 intended return movements (74 individuals). The largest individual arrival was recorded in Ancuabe (19 individuals). The largest intended return movements were observed in Nanagde (74 individuals). The largest transit was recorded in Nangade (115 individuals). The largest departures were recorded in Balama (24 individuals). Of the total population 9 per cent were displaced for the first time, and 91 per cent of reported IDPs had been displaced more than once prior to this latest movement.

### LARGEST MOVEMENTS RECORDED DURING THE REPORTING PERIOD

### KEY FIGURES

248

PEOPLE ON THE MOVE DURING THE REPORTING PERIOD

189

OF THE TOTAL IDPs INTEND TO RETURN TO THEIR PLACE OF ORIGIN

42%

OF THE IDPs REPORTED ARE CHILDREN

77%

OF THE REPORTED IDPs ARE LIVING WITH THE HOST COMMUNITY

14

ELDERLY WERE REPORTED, REPRESENTING THE LARGEST VULNERABLE GROUP

## ABOUT THE EMERGENCY TRACKING TOOL (ETT)

Due to the volume and fluidity of population movements in Cabo Delgado and Nampula, IOM's Displacement Tracking Matrix (DTM) rolled out its Emergency Tracking Tool (ETT) methodology in key areas presenting rapid and important movements of populations, in order to ensure the tracking of population on the move and to identify areas of displacement and settlements, and support the identification of critical needs. Mapping displacement trends on a weekly basis complements the information obtained through other activities of the DTM data collection in the country.

The objective of the Emergency Tracking Tool (ETT) is to collect information on large and sudden population movements. Findings from the Emergency Tracking tool aim to provide support to the Government and the humanitarian community by disseminating data on IDPs for effective humanitarian response planning amongst affected populations.

Emergency tracking teams and enumerators are deployed to Ancuabe, Namuno, Balama, Chiure, Ibo, Mueda, Nangade, Montepuez, Meluco, Mecufi, and Cidade de Pemba districts to collect data on displacement movements on a daily basis. Due to recent attacks, the DTM team has temporarily stopped assessments in Macomia, Muidumbe, Palma and Mocimboa da Praia districts.

## VULNERABILITIES BY LOCALITY (ARRIVALS)

| District/Locality | Total number of Individuals | Pregnant women | Elderly |
|-------------------|-----------------------------|----------------|---------|
| Ancuabe           | 19                          | -              | 3       |
| Natove            | 19                          | -              | 3       |
| Chiure            | 5                           | -              | -       |
| Namiciri          | 5                           | -              | -       |
| Ibo               | 2                           | 1              | -       |
| Cimento           | 2                           | 1              | -       |
| Grand Total       | 26                          | 1              | 3       |
