

EMERGENCY EVENT TRACKING

Data collection: 30 January 2022

CONFLICT

The DTM Emergency Event Tracking (EET) is deployed to track sudden displacement and population movements, provide more frequent updates on the scale of displacement, and quantify the affected population when needed. As a subcomponent of the new Mobility Tracking methodology in Sudan ([Round Three](#)), and activated on a need basis, EET utilises a broad network of key informants to capture best estimates of the affected population presence per location – a useful tool for humanitarian response planning and design.

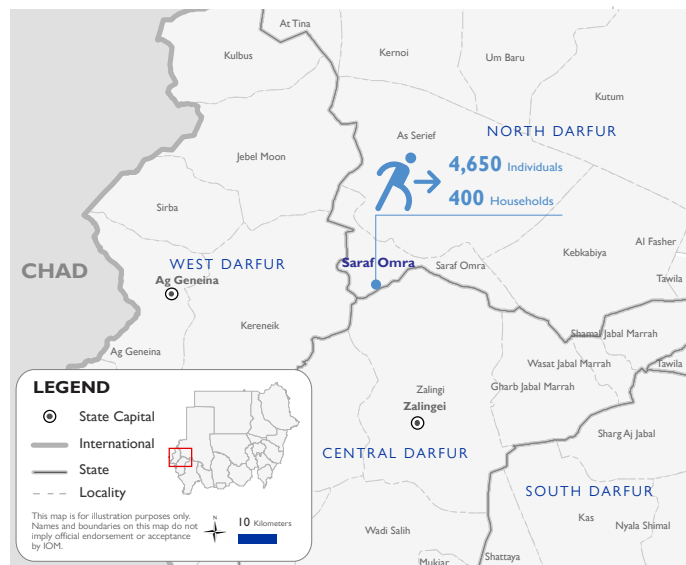

Event Overview

DTM teams activated its EET tool to monitor the displacement of members of the Fur tribe residing in Kalkoul Village in Saraf Omra locality, North Darfur following a threat of force from an Arab tribe on 21 December 2021. The threat of force followed a dispute over property and a demand from the Arab tribe to pay a fee. For more information, please see [EET Saraf Omra \(Kalkoul village\), North Darfur \(Update 001\)](#).

The second EET update estimates that a total number of 4,650 individuals (400 households) are currently seeking refuge in Saraf Omra Town (100%), in Saraf Omra locality, North Darfur. The entire IDP caseload (100%) was originally displaced from Kalkoul village in Sara Omra, North Darfur. Since the previous update, field teams report that approximately 250 households have returned to their location of origin on 30 January 2022 in order to engage in agricultural and pastoral livelihoods. Field teams report that this return is informed more by the difficulty of raising animals in urban locations, and not by an amelioration of the security situation.

All displaced individuals are Sudanese nationals. At least 565 cases of additional vulnerabilities in need of further support and assistance were identified through DTM's protection indicator. DTM teams report that no individuals have been killed and no individuals have sustained injuries, whilst at least 120 families report lost personal belongings, crops, and livestock. Consistent with the previous update, and based on a ranked scale, the three main priority needs for the displaced caseload are Food, Non-Food Items, and Health (Medical Needs).

IOM DISCLAIMER

The opinions expressed in the report are those of the authors and do not necessarily reflect the views of the International Organization for Migration (IOM). The designations employed and the presentation of material throughout the report do not imply the expression of any opinion whatsoever on the part of IOM concerning the legal status of any country, territory, city or area, or of its authorities, or concerning its frontiers or boundaries.

IOM is committed to the principle that humane and orderly migration benefits migrants and society. As an intergovernmental organization, IOM acts with its partners in the international community to: assist in the meeting of operational challenges of migration; advance understanding of migration issues; encourage social and economic development through migration; and uphold the human dignity and well-being of migrants.
