

FLASH REPORT, OVERVIEW- TROPICAL STORM ANA

IOM/INGD 72 Hours Aftermath Rapid assessment

Damages recorded in the communities assessed - Nampula, Zambezia, Sofala and Tete Provinces

IOM MOZAMBIQUE | NAMPULA, ZAMBEZIA, SOFALA AND TETE PROVINCES

31 JANUARY 2022

On 24 January 2022, Tropical Storm Ana made landfall in Angoche district, Nampula. The storm has significantly affected the provinces of Nampula, Zambezia and Tete. Further reports of damages have been recorded in Sofala, Niassa and Cabo Delgado provinces. Situational overviews recorded by the National Institute for Disaster Management and Risk Reduction (INGD) report at least 126,198 individuals affected, 210 people injured, 21 people killed as well infrastructure damages to 144 electricity lines, 249 schools and 39 health centers (OCHA, 30 January 2022).

Through an existing network of enumerators on ground, IOM, in close coordination with INGD, has been providing logistical and technical support in rapid assessments within the first 72 hours of Tropical Storm Ana landfall. Within these assessments, a total of 18 Accommodation centers were mapped across the provinces of Zambezia (15), Nampula (1) and Tete (3). As of 31 January, 16 Accommodation Centre have been deactivated- leaving 2 centers providing shelter for storm-affected families in Tete. An estimated 89% of all displaced families (13,323 households) have temporarily moved-in with a neighbour.

Detailed, joint multi-sectoral needs assessments, led by INGD and in collaboration with humanitarian partners, are currently ongoing. IOM's Displacement Tracking Matrix (DTM) teams continue to support in rapid assessments in Tete, Niassa, Sofala, Nampula and Zambezia – flagging locations, primary needs and impacts across communities yet to be evaluated through in-depth multi-sectoral assessments.

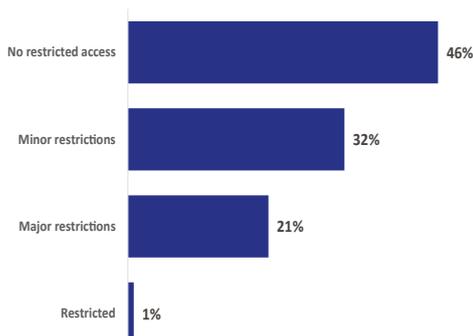

RAPID ASSESSMENT

Following these events, rapid assessments were conducted by the International Organization for Migration (IOM) in collaboration with the National Institute for Disaster Management and Risk Reduction (INGD), from the 25 January 2022. Rapid assessments are still ongoing with a focus on understanding the extent of initial displacements across accommodation centers and hosting communities as well as damages to houses and facilities across all affected localities in Tete, Niassa, Sofala, Nampula and Zambezia Provinces.

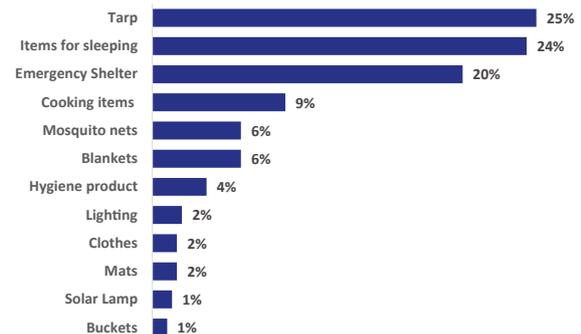

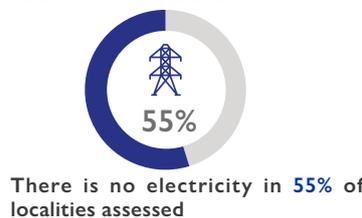

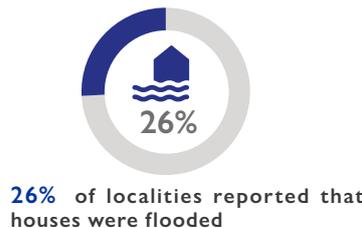

As a result of the impact of Tropical Storm Ana, an estimate of 42,800 families had their houses completely/partially destroyed in the districts assessed so far. Of these 80% are in Nampula (34,244 houses), 15% in Zambezia (6,488 houses), 2% in Tete (812 houses) and 3% in Sofala (1,256). In addition, 21 tents and 16 emergency shelters were completely or partially destroyed due to the rain and strong winds.

IOM/INGD identified 409 latrines and 8 water points damaged. Moreover, localities assessed so far identify at least 98 schools reporting partial and major damaged. Affected schools are in Nampula (62), Zambezia (29), Sofala (7) provinces. A total of 259 classrooms were completely or partially damaged in the affected schools.

In assessed locations, 16 health centres were also completely/partially damaged in Nampula (14) and Zambezia (2)

Accessibility status of assessed localities in the provinces

Top types of NFI needed but not accessible to affected populations

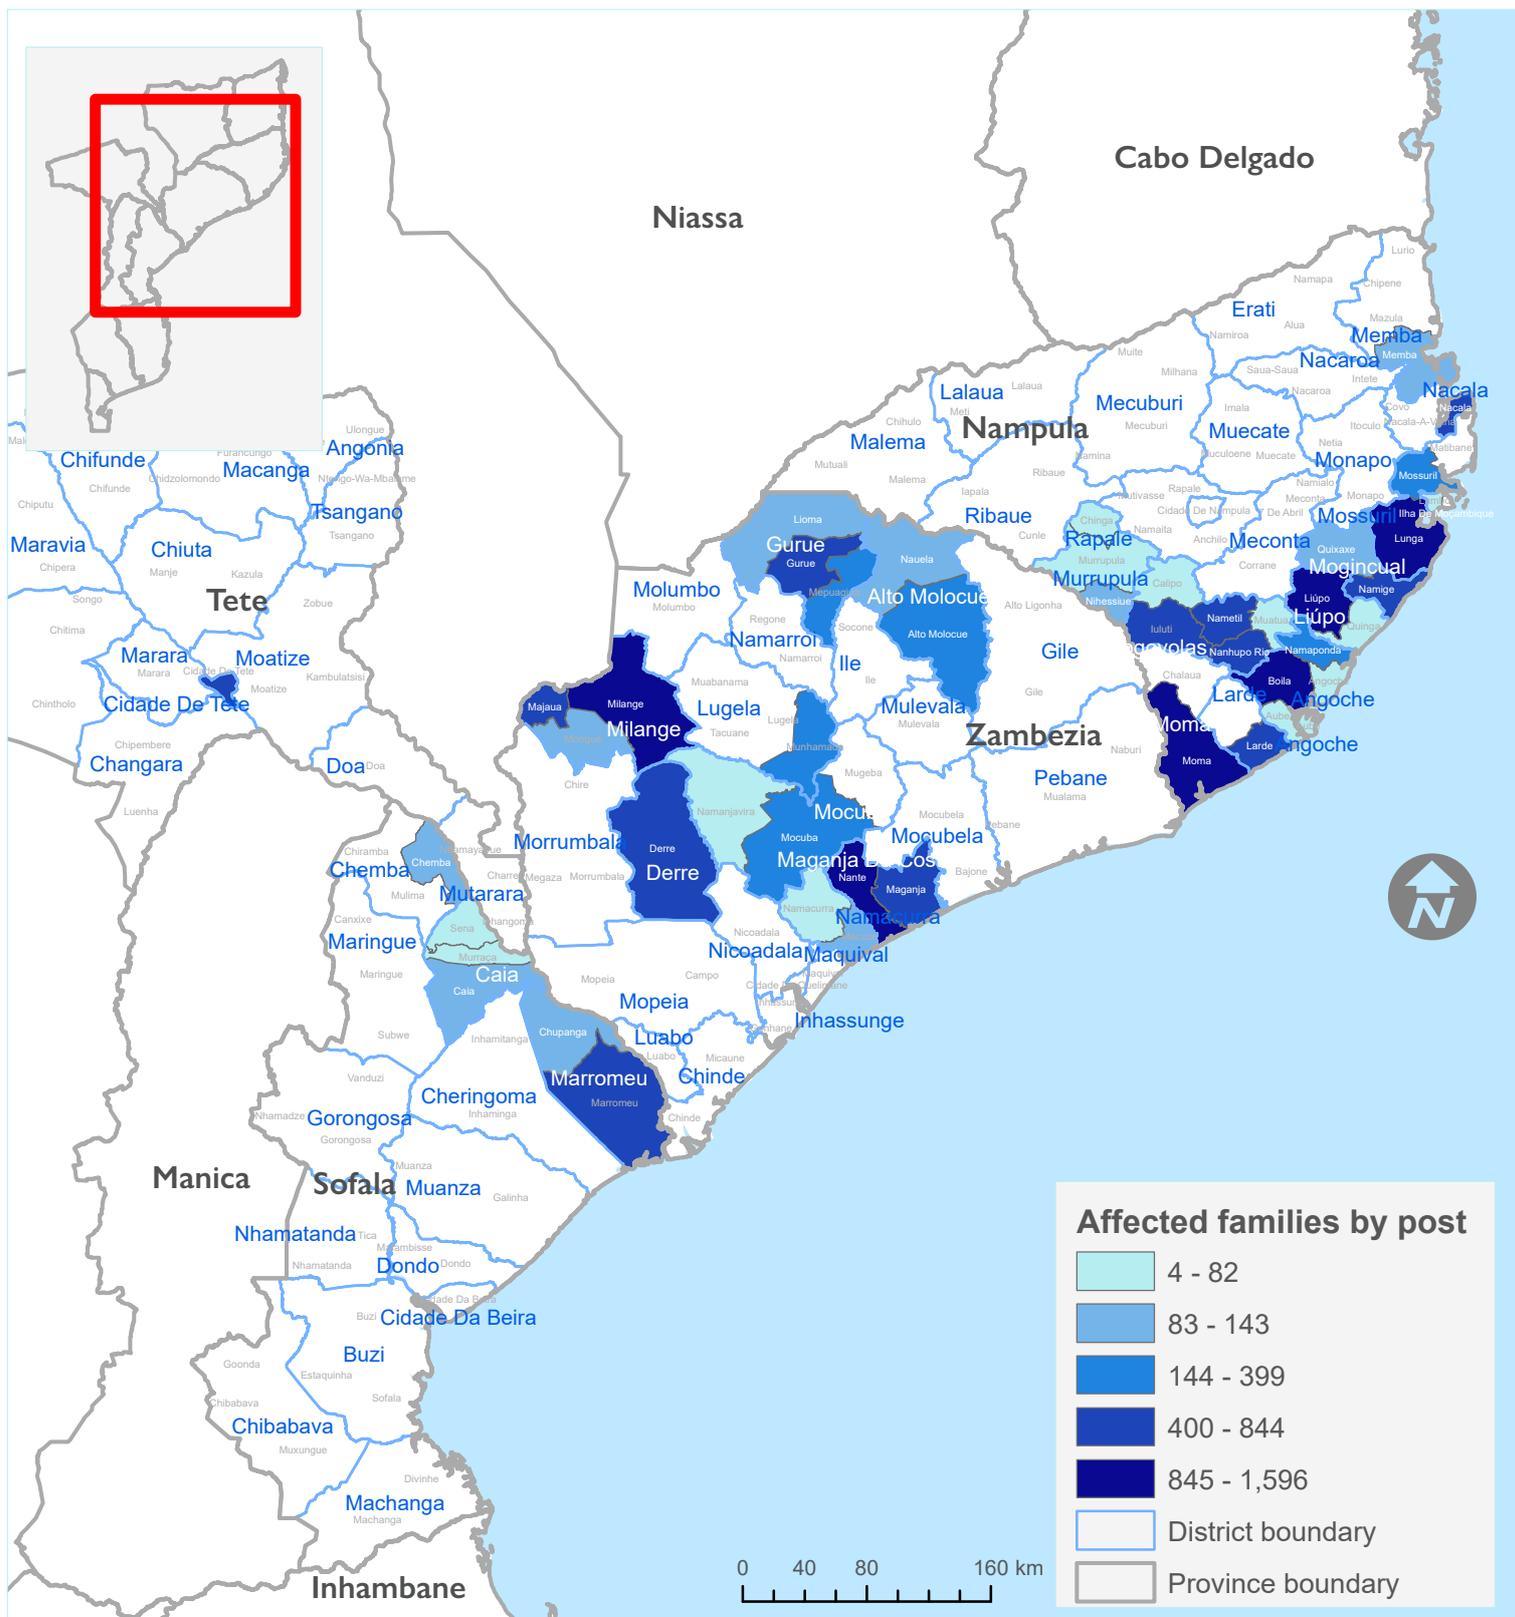

*Estimation of IDP households whose homes, emergency shelters and tents are completely destroyed

LOCALITIES AFFECTED IN NAMPULA, ZAMBEZIA, SOFALA, AND TETE PROVINCES BY TROPICAL STORM ANA

The table below summarizes the extent of damages to shelters and facilities across all localities assessed in Nampula, Zambezia, Sofala, and Tete Provinces. Please note that the total figure provided is a sum of affected structures (both partially and totally destroyed). For more information, and to have access to the complete data set, please contact the IOM/DTM team (DTMMozambique@iom.int).

Province	District	Post	No. of permanent houses completely destroyed?	No. of permanent houses partially destroyed?	No. of emergency shelters on the site are completely/ partially destroyed?	No. of tents on the site are completely/ partially destroyed?	No. of health center completely/ partially destroyed?	No. of schools completely/ partially destroyed?	No. of damaged latrines (in unit)	No. of water points were damaged or not working?
