IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of origin or displacement, allowing for regular reporting of new displacements* in terms of estimated numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of origin.

During the reporting period, between 30 January and 05 February 2022, IOM Yemen DTM tracked 363 households (HHs) (2,178 individuals**) displaced at least once.

Conflict was the main reason for displacement, accounting for 97 per cent (352 HHs) of the total, followed by economic reasons, accounting for three per cent (11 HHs).

Between 1 January and 5 February 2022, IOM Yemen DTM estimates that a cumulative 2,638 HHs (15,828 individuals) have experienced displacement at least once.

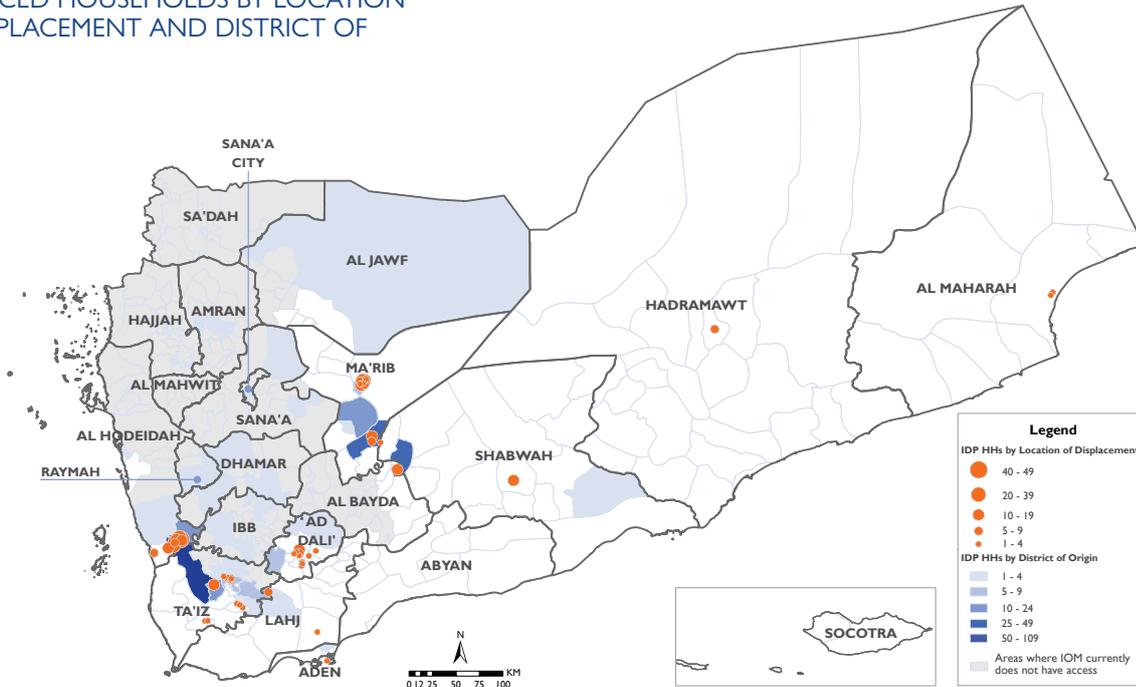

Some 85 HHs displaced in the previous reporting period, which covered 23 to 29 January 2022, in the governorates of Al Hodeidah (27 HHs), Hadramawt (23 HHs) and Ma'rib (19 HHs), Aden (15 HHs) and Ta'iz (1 HH) were only identified in the current reporting period. This figure has been added to the cumulative displacement total recorded from the beginning of the year.

* Displacement in Yemen refers to the 13 governorates where IOM DTM's team has access, namely: Abyan, Ad Dali', Aden, Al Bayda, Al Hodeidah, Al Jawf, Al Maharah, Hadramawt, Lahj, Ma'rib, Shabwah, Socotra, Ta'iz.
 ** IOM DTM estimates that one household represents six individuals.
