IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of origin or displacement, allowing for regular reporting of new displacements* in terms of estimated numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of origin.

During the reporting period, between 06 and 12 February 2022, IOM Yemen DTM tracked 329 households (1,974 individuals**) displaced at least once.

Conflict was the main reason for displacement, accounting for 91 per cent (229 HHs) of the total, followed by economic reasons, accounting for nine per cent (30 HHs).

Between 1 January and 12 February 2022, IOM Yemen DTM estimates that 3,054 households (HH) (18,324 Individuals) have experienced displacement at least once.

Some 87 HH displaced in the previous reporting period, which covered 30 January - 05 February 2022, in the governorates of Marib (33 HH), Taiz (21 HH), Al Hodeidah (14 HH), Aden (13 HH), Al Maharah (5 HH), and Lahj (1 HH), were only identified in the current period and so, this figure has been added to the cumulative displacement total recorded from the beginning of the year.

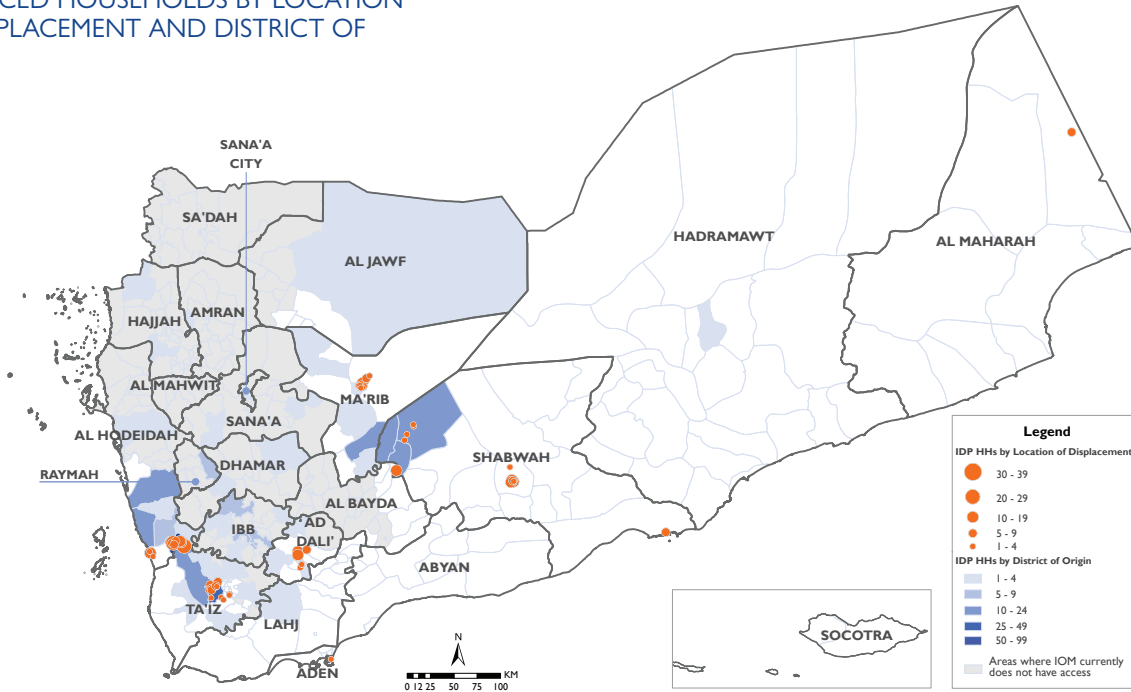

* Displacement in Yemen refers to the 13 governorates where IOM DTM's team has access, namely: Abyan, Ad Dali', Aden, Al Bayda, Al Hodeidah, Al Jawf, Al Maharah, Hadramawt, Lahj, Ma'rib, Shabwah, Socotra, Taiz.

** IOM DTM estimates that one household represents six individuals.
