

Affected Population:
2,660 Individuals

Damaged Shelters:
50

Casualties:
10

Movement Trigger:
Armed attacks

OVERVIEW

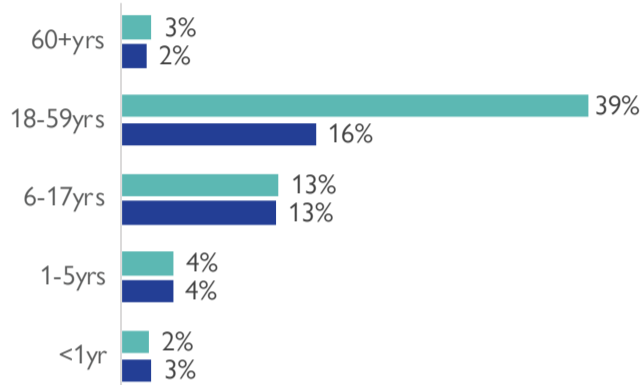

Nigeria's north-central and north-west zones are afflicted with a multidimensional crisis that is rooted in long-standing tensions between ethnic and religious groups and involves attacks by criminal groups and banditry/hirabah (such as kidnapping and grand theft along major highways). The crisis has accelerated during the past years because of the intensification of attacks and has resulted in widespread displacement across the region.

On 1st February 2022, armed clashes between bandits and local communities have led to new wave of population displacement in communities located in Agban ward of Kaura LGA in Kaduna State. Following this event, a rapid assessment was conducted by DTM (Displacement Tracking Matrix) field staff to inform the humanitarian community and government partners, and enable targeted response. Flash reports utilise direct observation and a broad network of key informants to gather representative data and collect information on the number, profile and immediate needs of affected populations.

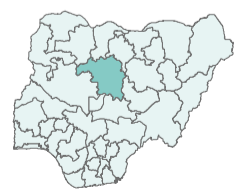

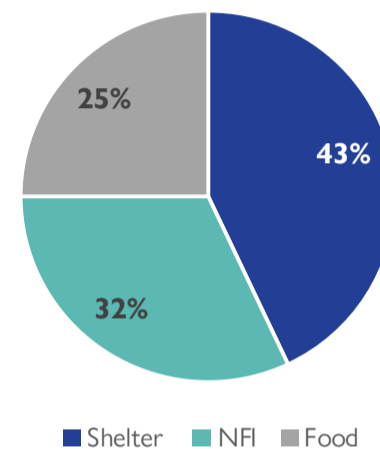

During the assessment, the DTM identified an estimated number of 2,660 individuals who were affected by the attack. A total of 2,658 individuals were displaced to neighbouring wards in Jema'a LGA in the same Kaduna State. A total of 10 casualties were reported, including 8 injuries and 2 fatalities.

The displaced persons are in dire need of shelter, NFI and food. At the time of reporting there has not been any assistance rendered to the displaced persons.
