IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements\* in terms of estimated numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of habitual residence.

During the reporting period, between 27 February and 5 March 2022, IOM Yemen DTM tracked 220 households (HHs) (1,320 individuals\*\*) displaced at least once.

Conflict was the main reason for displacement, accounting for 93 per cent (205 HHs) of the total, followed by economic reasons, accounting for 7 per cent (15 HHs).

Between 1 January and 5 March 2022, IOM Yemen DTM estimates that a cumulative 3,991 households (23,946 individuals) have experienced displacement at least once.

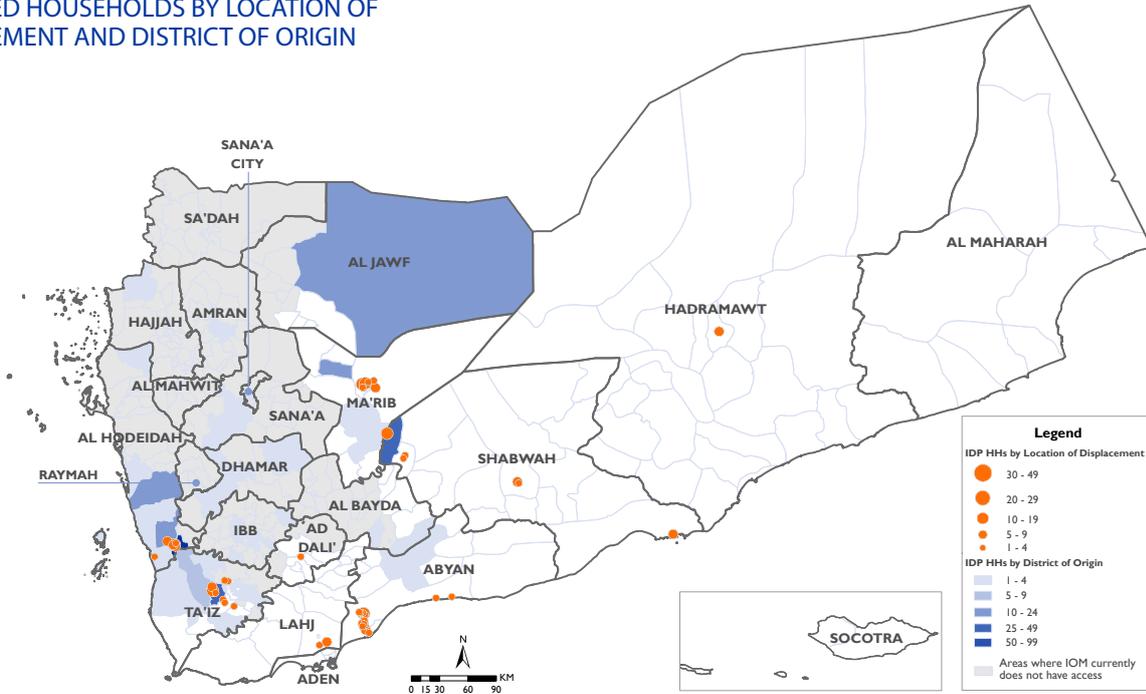

Some 58 HHs displaced in the previous reporting period, which covered 20 to 26 February 2022, in the governorates of Aden (27 HHs), Ta'iz (13 HHs), Ma'rib (11 HHs) and Al Maharah (7 HHs) were only identified in the current reporting period. This figure has been added to the cumulative displacement total recorded from the beginning of the year.

\* Displacement in Yemen refers to the 13 governorates where IOM DTM's team has access, namely: Abyan, Ad Dali', Aden, Al Bayda, Al Hodeidah, Al Jawf, Al Maharah, Hadramawt, Lahj, Ma'rib, Shabwah, Socotra, Ta'iz.  
\*\* IOM DTM estimates that one household represents six individuals.
