13% decrease in displacement from the previous week (233 HHs)

4 Returnee HHs

IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements¹ in terms of estimated numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of habitual residence.

During the reporting period, between 20 and 26 March 2022, IOM Yemen DTM tracked 202 households (HHs) (approximately 1,212 individuals²) displaced at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 77 per cent (156 HHs) of the total, followed by economic reasons related to conflict, accounting for 23 per cent (46 HHs).

Between 1 January and 26 March 2022, IOM Yemen DTM tracked a cumulative 4,786 households (28,716 individuals) that experienced displacement at least once. Since the beginning of the year, the number of tracked new instances of displacement has been declining steadily.

IOM identified 28 households displaced in the previous reporting period, which covered 13 to 19 March 2022, in the governorates of Al Hodeidah (12 HHs), Marib (9 HHs), Al Maharah (5 HHs), and Taiz (2 HHs). These figures have been added to the cumulative displacement total recorded since the beginning of the year.³

1 Displacement in Yemen refers to the 13 governorates where IOM DTM's team has access, namely: Abyan, Ad Dali, Aden, Al Bayda, Al Hodeidah, Al Jawf, Al Maharah, Hadramawt, Lahj, Ma'rib, Shabwah, Socotra, Taiz.

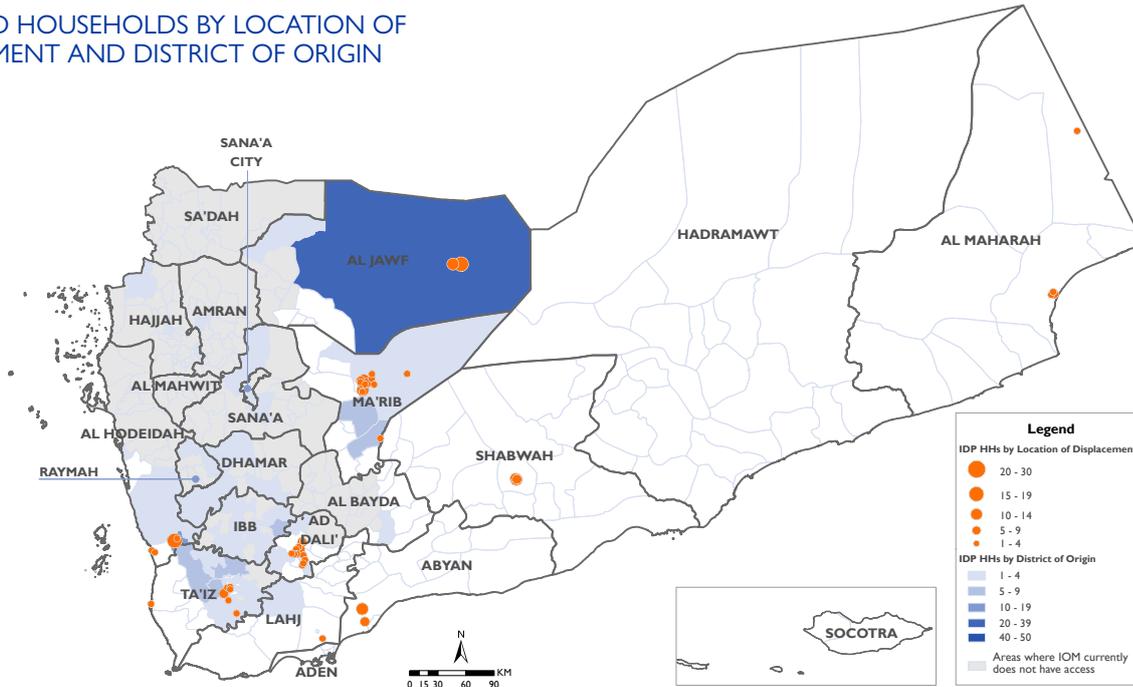

2 IOM DTM estimates that one household represents six individuals.

3 Please note that further additions to previous reporting periods can be reflected in cumulative totals without being individually addressed in narrative reports.
