#### **OVERVIEW AND TRENDS**

This Dashboard provides an analysis of the trends in population mobility observed at eight (8) flow monitoring points (FMPs), six (6) established at unofficial border crossing points between Burundi and the United Republic of Tanzania border at Kabogo, Kwa Rutuku, Mbundi, Kabuyenge, Mukambati and Kwa Buhinja; one (1) established at official border crossing point, between Burundi and the Democratic Republic of the Congo at Gatumba and one (1) established at official border crossing point, between Burundi and Rwanda at Gasenyi-Nemba. Over the reporting period, a total of 32,672 movements were observed at these points. About 52.8 per cent of all movements at the three borders were incoming and 47.2 per cent were outgoing.

Methodology: Flow monitoring is a component of DTM (Displacement Tracking Matrix) used to describe trends in the flows of individuals observed. Flow Monitoring (FM) is used for internal and cross-border population movement to better inform on nature, volume, direction and drivers of migration. The exercise is carried out at Flow Monitoring Points (FMPs) strategically established at the border with United Republic of Tanzania, Democratic Republic of the Congo and Rwanda where trained enumerators interview people passing through the Flow Monitoring Points (FMPs) in both directions, irrespective of their status (migrants or others) by nationality and with information disaggregated by sex and age. FM informs on population movements, origin and intended destinations, reasons for moving and population profiles.

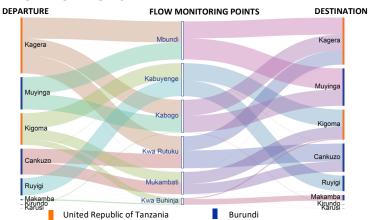

Limitations: The exercise does not aim at providing a full description of all movements in the country or through a specific point, but should be understood as a way of describing the characteristics of population movements and profiles at targeted locations limited to those people observed. Data in this report covers the period between 1 and 28 February 2022, 5 days a week (Monday to Friday) from 7:30 AM to 17:30 PM,

# **MIGRATION FLOWS**

# **HIGHLIGHTS**

Movements: Of the 29,062 movements, the largest proportion of travellers were between 18 and 39 years of age (57.5%). Most of the outgoing movements were headed to the United Republic of Tanzania. Movements were mainly made by foot (91.2%) followed by bicycle (4.8%).

**Duration of the movements:** The majority of the movements (89.1%) were of a temporary nature, lasting less than a day to a week.

Reasons for movement: The majority of the movements were driven by economic reasons (77.7%), though most of those lasted for one day or less (79.1%), while only 1.2 per cent were of a duration of more than a week. Other movements were driven by: the return to habitual residence (10.4%), family-related reasons (3.6%), seasonal movements (3.3%), health care related reasons (1.8%), purchase of good for personal consumption (1.6%) and other reasons (1.6%).

Flow Monitoring Points (FMPs): About 23.1 per cent of movements were tracked through Kwa Mbundi FMP; 20 per cent of movements were tracked through Kabuyenge FMP; 19.9 per cent of movements were tracked through Kabogo FMP; 19.4 per cent of movements through Kwa Rutuku FMP; 13.6 per cent of movements through Mukambati FMP and the remaining 4.1 per cent through Kwa Buhinja FMP.

# **MIGRATION FLOWS**

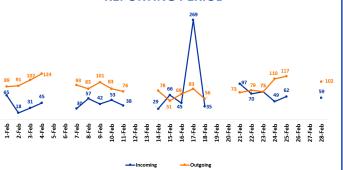

## **HIGHLIGHTS**

**Movements:** Of the 2,975 movements, the largest proportion of travellers were between 18 and 39 years of age (62.5%). Most of the outgoing movements were headed to the Democratic Republic of the Congo. Among the incoming movements, 244 people of Burundi nationals came from the Republic Democratic of the Congo (Mulongwe and Lusenda camps). About 41.3 per cent of the movements were carried out through taxis or cars, 36.4 per cent on motorbike, 19.2 per cent through bicycles or three-wheel vehicles, 8.2 per cent trough truck and 0.6 per cent by foot.

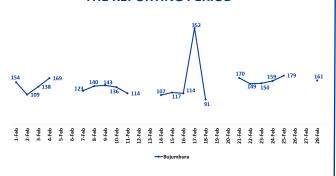

**Duration of the movement:** About 21.9% of the movements were of a temporary nature, lasting less than a day to a week, while 31.7% of the movements were over a period of more than one week to three months.

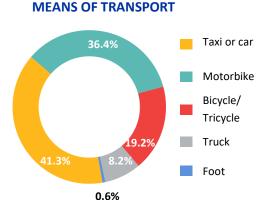

**Reasons for movement:** The majority of movements were driven by the need to return home (48.9%). Other movements were driven by: family-related reasons (25%), business/economic reasons (17%), health needs (4.6%), education (2.5%), purchase of goods for personal consumption (1.1%) and other reasons (0.8%).
