

EMERGENCY EVENT TRACKING

Data collection: 28 March 2022

CONFLICT

The DTM Emergency Event Tracking (EET) is deployed to track sudden displacement and population movements, provide more frequent updates on the scale of displacement, and quantify the affected population when needed. As a subcomponent of the new Mobility Tracking methodology in Sudan (Round Three), and activated on a need basis, EET utilises a broad network of key informants to capture best estimates of the affected population presence per location – a useful tool for humanitarian response planning and design.

Event Overview

1,372
IDP individuals

273
IDP households

DTM teams activated EET to monitor the displacement of individuals affected by inter-communal clashes between the Bani Hussein and Mahriya tribes in As Serief locality, North Darfur on 22 and 23 March 2022. Clashes between the two tribes were the culmination of rising inter-communal tensions following a fire in Mogran Jabal Amir on 21 March 2022.

The first EET update estimates a total number of 1,372 individuals (273 households) currently seeking shelter in As Serief Town (95%) in As Serief locality, and Kebkabiya Town (5%) in Kebkabiya locality, North Darfur. The IDP caseload was originally displaced from Ghusa village (27%), Dar Essalaam (24%), Algoni Gibreel (16%), Malaha (16%), Jur Tobak (12%), and Gira Alzawya (5%) in As Serief locality, North Darfur.

Field teams indicate that four individuals were killed, six individuals were injured, and 36 cases of lost goods, cattle and/or livestock. All displaced individuals are Sudanese nationals. At least 119 cases of additional vulnerabilities in need of assistance and support were identified by key informants through DTM's protection indicator. Additionally, DTM Sudan estimates that there are approximately 206 persons with disabilities among the IDP caseload.* Consistent with the previous EET, and based on a ranking scale, the three priority needs across the caseload are Emergency Shelter, Nutrition, and Food.

Priority Needs

(Ranking scale)

Emergency Shelter

Nutrition

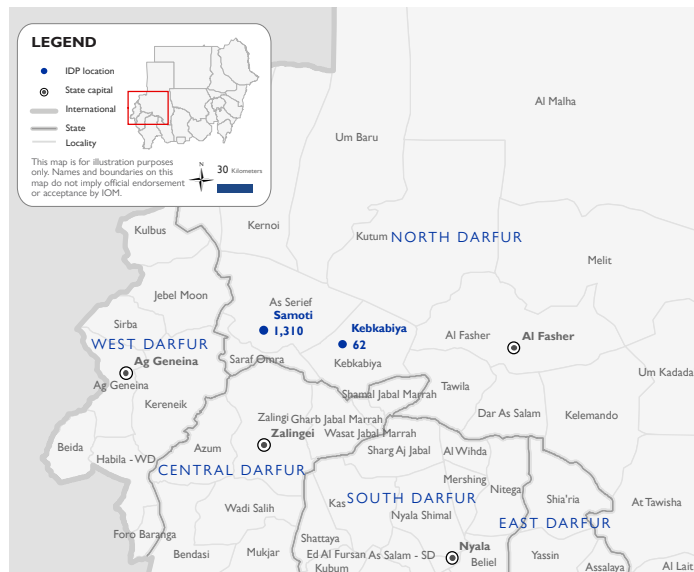

Food

Demographics

Return Intention

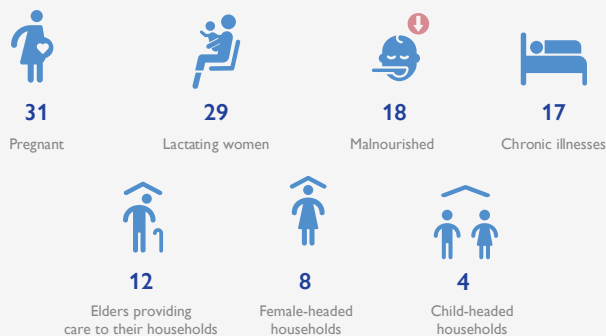

Data collected through the return intention indicator suggests that the entire IDP caseload (100%) intends to return to their locations of origin.

IOM DISCLAIMER

The opinions expressed in the report are those of the authors and do not necessarily reflect the views of the International Organization for Migration (IOM). The designations employed and the presentation of material throughout the report do not imply the expression of any opinion whatsoever on the part of IOM concerning the legal status of any country, territory, city or area, or of its authorities, or concerning its frontiers or boundaries.

IOM is committed to the principle that humane and orderly migration benefits migrants and society. As an intergovernmental organization, IOM acts with its partners in the international community to: assist in the meeting of operational challenges of migration; advance understanding of migration issues; encourage social and economic development through migration; and uphold the human dignity and well-being of migrants.

* DTM Sudan adopts the WHO global estimate that approximately 15% of the total population are persons with disabilities (PwDs).
