

DTM Emergency Tracking Tool (ETT) is deployed to track and provide up-to-date information on sudden displacement and other population movements

ETT Report: No. 150/ 1 February - 29 March 2022

During the reporting period (1st February - 29 March 2022), a total of 104 movements were recorded - 53 arrivals (995 individuals). 32 departures (893 individuals) and 19 returns (1,453 individuals). The largest individuals arrivals was recorded in Cidade de Nampula (922 individuals). The largest departure was recorded in Cidade de Nampula (686 individuals). Only 47 per cent of the movements that the displaced had been displaced only once before this last movement and 53 per cent of reported IDPs had been displaced more than once prior to this latest

ABOUT THE EMERGENCY TRACKING TOOL (ETT)

Due to the volume and fluidity of population movements in Cabo Delgado, IOM's Displacement Tracking Matrix (DTM) rolled out its Emergency Tracking Tool (ETT) methodology in key areas presenting rapid and important movements of populations, in order to ensure the tracking of population on the move and to identify areas of displacement and settlements, and support the identification of critical needs. Mapping displacement trends on a weekly basis complements the information obtained through other activities of the DTM data collection in the country.

The objective of the Emergency Tracking Tool (ETT) is to collect information on large and sudden population movements. Findings from the Emergency Tracking tool aim to provide support to the Government and the humanitarian community by disseminating data on IDPs for effective humanitarian response planning amongst affected populations.

VULNERABILITIES BY LOCALITY (ARRIVALS)

District/Locality:	Total number of Individuals	Pregnant women	Elderly
