

### Overview of affected population

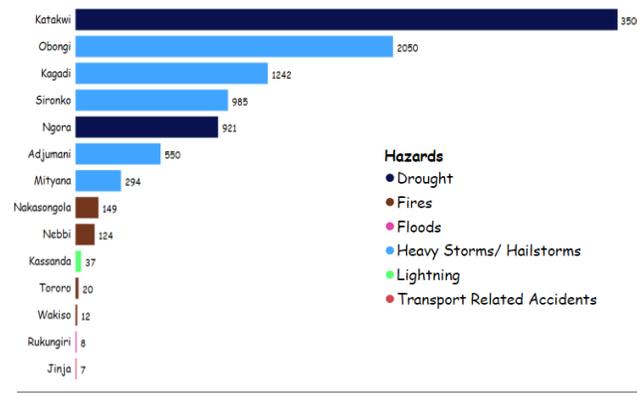

### March 2022 observations

- Fires, heavy storms/hailstorms, floods, lightning, transport related accidents and drought were the main disasters experienced in March.
- A total of 9,918 individual were affected representing 3,672 households. 2,718 individuals from 453 households were internally displaced by disasters.
- Adults (19-64) were the most affected (47%), followed by children <18 (38%) and the elderly >64 (15%).
- The most pressing needs are health and hygiene related.
- So far in 2022, 14,671 individuals have been affected by disasters, representing 4,800 households. A total of 3,198 individuals representing 533 households have been Internally displaced.
- Overall, near normal (average) to above normal (enhanced) rainfall is predicted over most parts of the country with high probability of occurrence over parts of north-eastern Uganda. This is most likely to trigger hazards such as floods, heavy storms/hail and landslides in areas prone to such disasters (notably the Elgon, Teso and Rwenzori regions).
