### DISPLACEMENT REASONS\*\*

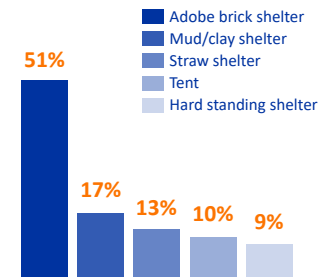

\*\*IDP returnees from abroad are not represented (3,056 Households)

### DISPLACEMENT LOCATIONS

### TYPES OF SHELTERS

**METHODOLOGY:** IOM's Displacement Tracking Matrix is a comprehensive system to analyze and disseminate information to better understand the movements and needs of Internally Displaced Persons (IDPs) in Burundi. The baseline assessment aims at providing information on the stock (presence) by Colline of IDPs which are categorized in three groups: Internally Displaced Persons (IDPs), IDPs who returned to their Colline of origin but not their home and returnees from abroad who still live in displacement. The baseline assessment also collects information on the cause of displacement and the type of shelter hosting IDPs. Data collection is conducted 4 times per year by trained Burundian Red Cross volunteers operating at all administrative levels: provinces, communes and *collines*.
