IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements¹ in terms of estimated numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of habitual residence.

During the reporting period, between 17 to 23 April 2022, IOM Yemen DTM tracked 116 households (HHs) (approximately 696 individuals²) displaced at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 82 per cent (95 HHs) of the total, followed by economic reasons related to conflict, accounting for 18 per cent (21 HHs).

Between 1 January and 23 April 2022, IOM Yemen DTM tracked a cumulative 5,556 households (33,336 individuals) that experienced displacement at least once. Since the beginning of the year, the number of tracked new instances of displacement has been declining steadily.

IOM identified 92 households displaced in the previous reporting period, which covered 10 to 16 April 2022, in the governorates of Al Hodeidah (55 HHs), Aden (24 HHs), Ta'iz (8 HHs) and Ma'rib (5 HHs). These figures have been added to the cumulative displacement total recorded since the beginning of the year.³

4. New arrivals recorded by IOM DTM within the reporting period. This does not necessarily represent the exact total increase of HHs due to an unknown number of instances of multiple displacements and/or return.

1. Displacement in Yemen refers to the 13 governorates where IOM DTM's team has access, namely: Abyan, Ad Dali', Aden, Al Bayda, Al Hodeidah, Al Jawf, Al Maharah, Hadramawt, Lahj, Ma'rib, Shabwah, Socotra, Ta'iz.

2. IOM DTM estimates that one household represents six individuals.

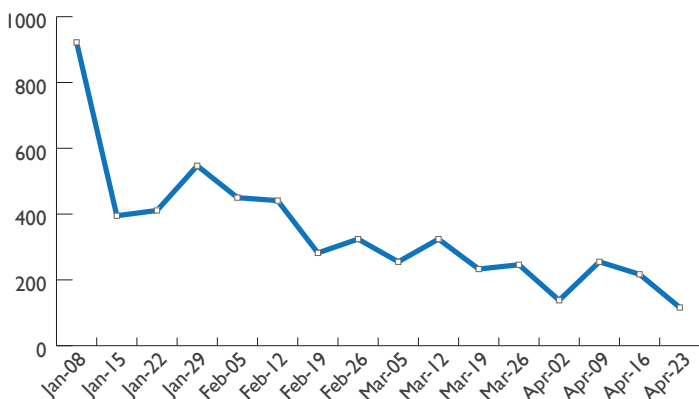

3. Please note that further additions to previous reporting periods can be reflected in cumulative totals without being individually addressed in narrative reports.
