Returnee HHs

IOM Yemen DTM's Rapid Displacement Tracking (RDT) tool collects data on estimated numbers of households forced to flee on a daily basis from their locations of habitual residence or displacement, allowing for regular reporting of new displacements<sup>1</sup> in terms of estimated numbers, causes of displacement, geography and needs. It also tracks returnees who returned to their location of habitual residence.

Between 22 and 28 May 2022, IOM Yemen DTM tracked 179 households (1,074 individuals)<sup>2</sup> who experienced displacement at least once.

Safety and security concerns as a result of the conflict were the main reason for displacement, accounting for 81 per cent (145 HHs) of the total, followed by economic reasons related to conflict, accounting for 19 per cent (34 HHs).

Between 1 January to 28 May 2022, IOM Yemen DTM tracked 6,165 households (HH) (36,990 Individuals) that experienced displacement at least once.

Since the beginning of the year, the number of tracked new instances of displacement has been declining steadily.
