

OVERVIEW

IOM Pakistan collects data on the outflows of **undocumented Afghan migrants** at the Torkham and Chaman border crossing points in an effort to better understand the migration movements of undocumented Afghan migrants returning to Afghanistan from Pakistan. This exercise is part of the **European Union** funded project “Displacement Tracking Matrix Regional Evidence for Migration Analysis and Policy (DTM REMAP)”.

From 04 to 17 June 2022, **3,002** undocumented Afghan migrants returned to Afghanistan from Pakistan, including **322** through the Torkham border point and **2,680** through the Chaman border point. During the reporting period, border authorities facilitated the return of **103** individuals due to the lack of legal documentation to remain in Pakistan. Therefore, information concerning these **103** individuals is not included in the report analysis.

HIGHLIGHTS

- During the reporting period, 9% of returnees were categorized as vulnerable persons, mainly chronically ill and elderly.
- In Pakistan, the primary occupations reported by returnees were: unskilled labor (57%), skilled labor (26%), business (14%) and salaried job (2%).
- All returnees were carrying household items, cash, personal belongings and productive assets when interviewed. They also travelled with additional items, such as productive assets (91%) and transportation or private vehicles (8%).
- The average cost of travelling from Pakistan to Afghanistan reported was 30,215 PKR per family.
- The top 3 challenges returnees expected to face in Afghanistan were: arranging for livelihoods, finding income opportunities and settling into a new city.
