DISPLACEMENT TRACKING MATRIX NIGERIA NORTH-EAST ZONE

FLASH REPORT-WINDSTORM AND RAINSTORM JERE AND MAIDUGURI M.C LGA

08 July 2022

185 Households

938 Individuals

6 sites

185 Damaged/Flooded shelters

No Damaged toilets

No Damaged shower points

OVERVIEW

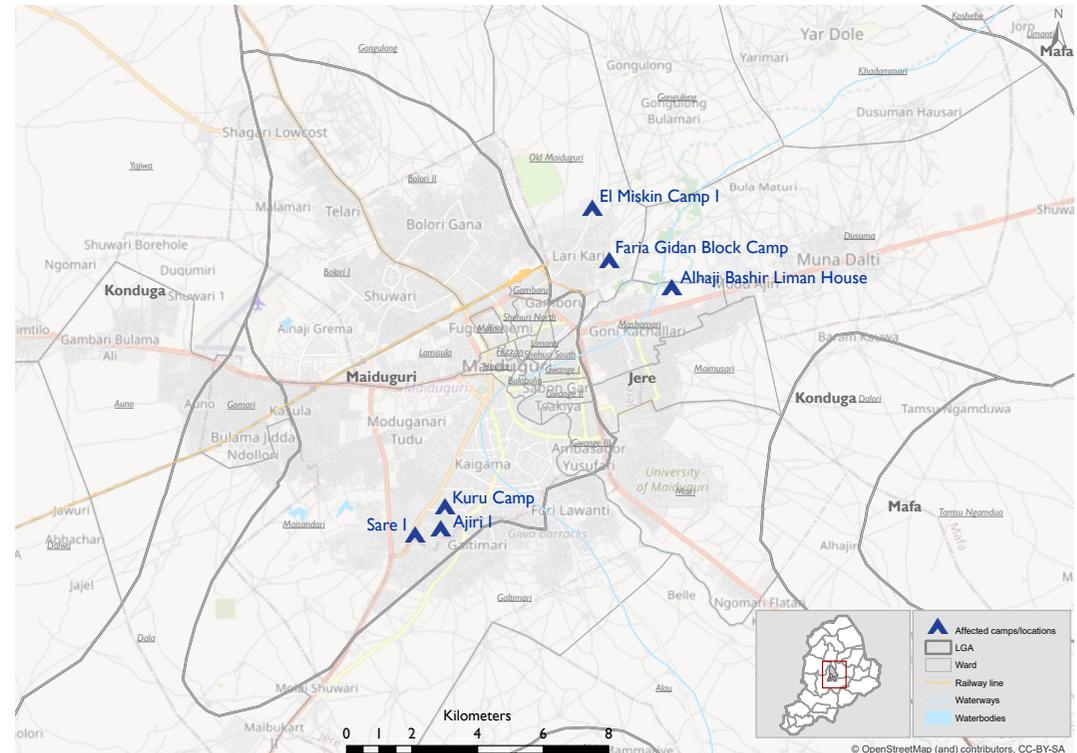

With the onset of the rainy season in Nigeria's northeastern state of Borno, varying degrees of damages have been reported in camps and camp-like settings. Heavy rainfalls, accompanied by strong winds have caused serious damages to IDP shelters and camp infrastructures.

Between 29 June and 05 July 2022, IOM's DTM programme carried out assessments to ascertain the level of damage sustained in camps and camp-like settings due to heavy windstorms and rainfall. Overall, 2 collective settlements, 1 host community location and 3 camps in Maiduguri M.C, and Jere LGAs were assessed. The worst-hit of the assessed sites was Faria Gidan Block IDP Camp, a camp in Old Maiduguri ward of Jere LGA, where a heavy rainstorm damaged 64 shelters, affecting an estimated 350 individuals.

In total, 185 shelters were either damaged or flooded by storms, leaving a total of 185 households in immediate need of shelter. There were no casualties reported as a result of the storms.

NEEDS

There is a major need of shelter, shelter repair kits and Food assistance as most shelters need re-enforcement. As a preventive measure against flooding, most IDP sites need good drainage systems and the use of sand bags to channel the water flow.

The maps in this report are for illustration purposes only. The depiction and use of boundaries, geographic names, and related data shown on maps and included in this report are not warranted to be error free nor do they imply judgment on the legal status of any territory, or any endorsement or acceptance of such boundaries by IOM
